A WEEK OF FAST HOCKEY Senior and Junior Teams Make Records

LACOMBE WINS FROM INNSPAID IN OVERTIME

In a Big Six League fixture on Friday night last, on the Innisfail arena. It was a real game and the issue was in doubt right to the close of the game. At the end of the first period, Innisfail was in the lead with the score standing 3 to 1. This margin was not of long duration, and in the third period George Brooks got two goals, tying the score. In the overtime period Brooks got two more goals, Lacombe winning the game 5 to 3.

RED DEER WINS

Red Deer won from Olds on Saturday night by a score of 5 to 4. Red Deer had the game all their own way for the first two periods, leading Olds 5 to 1 early in the last period. Olds suddenly broke loose and in this period scored 3 goals to Red Deer's nil. The game ending 5 to 4. Over 600 fans witnessed the game.

LACOMBE NATIVE SONS WIN AT BENTLEY

In a good, fast game before a large crowd of fans on the Bentley Arena, on Saturday night last, Lacombe Native Sons defeated Bentley 2 to 1. The game went into overtime, and in the first period of the overtime Lacombe got through for a goal. This was a Little 4 League fixture and was an interesting game to watch. The teams of this league are playing all hockey and all the teams are evenly matched. Watch for future games and turn out.

JUVENILES BEAT SETTLER

Juveniles from Settler went down to defeat in a hard fought game against local team at Lacombe on Saturday night, the score being 3 to 2. The first period was scoreless, each side seeming to be about on equal standing as to shooting and play. In the second session, however, Lacombe in a line assault began the scoring. Chapman followed suit a few minutes later with the second goal and S. Todd, taking a pass from E. Todd, chalked up the third tally. Settler fought hard and finally Coogan got past Bennett for their first counter. In the third period, the locals kept the visitors bottled up, but Sharpe and Harrison broke through for Sharpe to score.

LACOMBE DWAN, E. TODD, MIST, MOORE, LANDON, PERKINS.

NATIVE SONS WIN AGAIN

On Monday Lacombe Native Sons taught the Settlers how to take Red Deer into camp. If this league plays the class of hockey all through the season as they have started, they should draw big crowds, because, as we tell you something folks! Anyway, as far as Lacombe is concerned they are all "Native Sons" hence the name. So turn out and boost your own boys. And just a word for the team. Let me see. Oh, yes, for President they have genial George, who guided the Settlers to several intermediate Championships. And for Manager, Fred Jackson. The boys like him, and not only the boys either. The Secretary is who is known as Van, and the Sons, well they are rather too many to mention, but they have such men as Pote—you know old war horse Pote—and Stewie, in fact two Stewies and Friselle, in fact players from every walk of life. But they all can sure do their stuff—but, then, you don't have to believe this correspondent—just come to the game and see for yourself.

THE 'NATIVE SONS'

This recently organized hockey team, composed entirely of local boys, is making a good name for itself. The team is playing good hockey now, and is bound to improve as the season advances. The primary purpose of organizing this aggregation is to promote and train the younger boys of the town and teach them how to play the game. A most capable executive in charge of the team is, Fred Jackson, Van Wamhoeve and George Stewie, and they are working wonders with the talent they have at hand. Too much can not be said about the merits of bringing up local players. It is good, healthy exercise for the rising generation, and encourages good, clean sportsmanship. It will be

from the schedule of home games printed below, that Sylvan Lake will play here on Monday next. This Little 4 League fixture should be well worth seeing. Sylvan Lake has a nice little team and should give the local team a good run for their money. Turn out and give this team your support. Their expenses are comparatively low, but nevertheless, it costs something to travel to the adjoining towns. The admission price is only 25c, and believe me you will get your money's worth. The schedule of home games in the Little 4 League is as follows: Monday, Jan. 10th—Sylvan Lake at Lacombe.

BLACKFALDS BARTER BULLETIN

To help those who have articles to sell or trade, a board with six files has been placed in Mr. J. A. Martin's General Store. On the files are printed cards, each file labeled with one of the following labels: Farm Produce, Labor, Furniture, Live Stock, Farm Equipment, Food and Groceries, and Miscellaneous. Refrainments were served following the meeting and an enjoyable social time spent.

What's Going on As League Talks

It seems that the dignified retorts of Sir John Simon and of the Lytton Commission have wholly failed to check the Manchurian war. The revival of fighting between Chinese and Japanese, upon an extensive scale, is the logical—indeed the inevitable—outcome of the pathetically inept attempts to conciliate both sides which the League of Nations as a whole, Great Britain and France included, and the United States made following the Shanghai atrocities.

We have been watching a situation which is so ironic that it presents a challenge to any master of irony to invent a better. It is Gilbertian in a degree. The powers have moved cautiously, so cautiously that they have actually done nothing at all to check the triumphant advance of Japanese imperialism. They have talked, and conferred, and said many silly things about the technical difficulties in the way of calling China a unified nation, and all the time the Japanese have been doing precisely what they wanted to do.

We are willing to admit that reports of Japanese atrocities have been exaggerated; we are willing to admit, even that there is a possibility of certain news stories having been colored by political prejudice. Yet certain indisputable facts remain. Japan entered Manchuria in defiance of international agreement; Japan consolidated her position in Manchuria while the League of Nations was holding special sessions to find out what could be done about her having entered that territory; Japan proceeded to attack Shanghai, while the League of Nations was trying to decide what should be done about the Japanese invasion of Shanghai.

There can only be two reasons for this continued apathy on the part of the Western World toward what is a blatant and tragic example of the failure of the international ideals of this century. Either the powers are completely impotent in the face of any real threat of force, or else it is politically or economically expedient for those powers which control the League to wink the eye at what is occurring in Manchuria.

PROVINCIAL SEED FAIR

One of the largest displays of high quality seed grain ever gathered in the province appears this week in the provincial seed fair at Edmonton. Some 600 entries were made for the fair, including 316 entries from members of junior grain clubs, in wheat, oats and barley. There are 85 entries in the regular wheat classes alone. One interesting exhibit is the display of corn in the various corn classes, more than 1,200 ears being on display. Another feature of the fair is the visit of some 50 members of junior grain clubs who are guests of the Edmonton Chapter of Commerce for three days in the city.

Electric lamps etc. at Morrison and Johnston, Ltd.

REBEKAH INSTALLATION

At their regular meeting on Monday, January 9th, officers of Lacombe Rebekah Lodge No. 101 were installed as follows: P.N.G., Opal Danner; N.G., Beulah Bach; V.G., Clara Baugher; Chaplain, Mattie Reeves; R.S.N.G., Eva Shaw; L.S.N.G., Emily Mast; Musician, Walter Clark; R.S.N.G., Inez Clark; L.S.N.G., Ada Vaughn; I.G., Marjorie Brooks; O.G., Lilian Hunter; Secretary M. Ethel Todd; Treasurer, Alma Saunders.

M. Ethel Todd, P.D.P.P., assisted as installing officers, with the aid of Eva Shaw, Dep. Marshall; Marjorie Brooks, Dep. Warden; Mattie Reeves; Dep. Sec. and Treas. C. E. Todd, Dep. Chaplain.

BLACKFALDS BARTER BULLETIN

To help those who have articles to sell or trade, a board with six files has been placed in Mr. J. A. Martin's General Store. On the files are printed cards, each file labeled with one of the following labels: Farm Produce, Labor, Furniture, Live Stock, Farm Equipment, Food and Groceries, and Miscellaneous. Refrainments were served following the meeting and an enjoyable social time spent.

Very 'Tut for Tat'

From the Vancouver Province Listen a minute or two to the telling of this little story, and marvel not at the end of it that peace and goodwill among the nations of the world is so hard to achieve. A very indignant lady tells it, and she tells it in a letter to the New York Times. She wanted to send some Christmas cards to her home in Elizabeth, New Jersey, to Christmas friends of hers, living in Quebec. And the experience she has had has thoroughly discouraged her, and she puts all the blame of it upon us Canadians, and she is very ironic over all the usual talk about strengthening ties of friendship between Canada and the United States.

LOCAL WOODMEN CELEBRATE 50th ANNIVERSARY

Thursday evening, January 5th, marked an important date in the history of Woodcraft, it being the 50th anniversary of this splendid society. Between forty and fifty members met in Lacombe in the Oddfellows' hall to celebrate this historic event. A number of visitors were present from the Red Deer Lodge. Ladies' degree team gave the delectable treat of refreshments. Most interesting presentation then took place when Mr. B. S. Cameron, clerk, presented Messrs. Federer, N. N. Woody, G. P. Vickers and Roy Rice. Mr. Cameron's remarks were most fitting upon this occasion. Mr. Deckard then gave a brief review of the fifty years work and activity of The Modern Woodman. This was followed by a social hour during which Mrs. A. H. Aldwinckle gave a delightful reading in her usual capable manner. Mr. Geo. Friszell concluded the programme by reciting very feelingly "The Bachelor's Lament." Refreshments were then served by the ladies.

THEY GET THEIR MEN!

Knoxville, Tenn.—Jan 9.—William McLean, 21-years-old Tennessee, is in jail here, and his father, Kenneth McLean, is held in Chattanooga, charged with the murder of Walter J. Parville, Mannville, Alberta, farmer, last September. Arrests of the McLeans, Saturday, were believed to mark the end of a long and difficult trail for men of the Mounted Police force, who had followed them through Alberta, Saskatchewan and the United States to Tennessee. At the commencement, they had barely a clue to link the two men with the Parville slaying.

Remember the concert and dance in Bentley Community Hall on Friday, (tomorrow) night. Proceeds will be in aid of the Bentley Hospital. Get our prices on Skating Outfits. Special prices for January. Morrison and Johnston, Ltd.

There will be an old time dance in Spruceville Hall, Friday, January 12th. Flegat's Orchestra.

President Beatty Hopeful of Future

In his New Year's message to the Canadian people, Mr. E. W. Beatty, president of the Canadian Pacific Railway Company, sounds an optimistic note which has long been lacking. The significant part of Mr. Beatty's address to us is the fact that he stresses the change which has taken place in the attitude of the average man and woman toward national problems. Mr. Beatty said:

It seems to me that the most important of the several forward moves that have been recorded during the past year is the change in the minds of the people of this country. A year ago most of us were in a state of bewildered wonderment as to what happened, and one thing we were sure of was that it could not last much longer. Since then, even after event of an economic nature has forced upon some of our people a far sounder realization of the gravity of the situation and the imperative need of mental, physical and economic adjustment to the changed conditions.

That was the first step toward rehabilitation that had to be achieved and nothing much could be done until the move in that direction was decisive and efficient. In our own New Year message we stressed what is to us this all-important matter of mental attitude toward present conditions. The willingness of the Canadian people to look at their problems without prejudice which two or three years ago stood in the way of reconstruction is surely the most promising aspect of the coming year.

Very 'Tut for Tat'

From the Vancouver Province Listen a minute or two to the telling of this little story, and marvel not at the end of it that peace and goodwill among the nations of the world is so hard to achieve. A very indignant lady tells it, and she tells it in a letter to the New York Times. She wanted to send some Christmas cards to her home in Elizabeth, New Jersey, to Christmas friends of hers, living in Quebec. And the experience she has had has thoroughly discouraged her, and she puts all the blame of it upon us Canadians, and she is very ironic over all the usual talk about strengthening ties of friendship between Canada and the United States.

PONOKA NOTES

Vernie Gates and Henry Flinckham have enlisted for military service in China, and will leave for there at once. Vernie is an officer and Henry as a gunner. Vernie is a World War soldier. It seems their work will be to train the Chinese.

After an absence of several months to Illinois, Miss Magee has resumed her duties as vice-principal in the High School. Miss Magee will be welcomed back by the staff and pupils as well as her many Ponoka friends.

One Monday, Mr. George Klages of Bismark district was united in marriage to Miss Lena Voigt, of South Dakota. The wedding was held in the United Church of Canada with Rev. T. R. Davies officiating.

Mrs. and Mrs. Laugha M. McLean announce the marriage of their daughter, Irene Florence, to Dr. Adm. A. Reeves, on Tuesday, November the twenty-second, at Toronto, Ont. Mrs. Reeves taught school here for a number of years, and has many friends in Ponoka.

ALBERTA ENTRIES AT REGINA

Alberta's first entry in the world grain congress to be held at Regina next Summer is Harold Moore of Bindloos, who is to show a sample of the wheat grown here. He has been developing during the past few years, and which has bright prospects as a crop for restoration of the range. Other entries already made include one of two-rowed barley from Norman Peak of Leduc, and entries from Hamilton Bros., Lethbridge, in wheat. Entries for Regina close January 31. It is anticipated that there will be 200 entries from Alberta. The provincial department of agriculture has agreed to pay half the entry fee on approved exhibits from the province. The full entry fee is \$2.00 in classes with from \$2.50 to \$5.00 in prize money and \$2.50 in the lower classes.

SPRUCVILLE NEWS

The Jiggs Supper held at the hall Friday night for the Community was much enjoyed by all present. "Maggie and Jiggs" helping to make the evening a success. Congratulations to Mr. and Mrs. Archie Skout on the birth of a son on New Year's day.

The U.F.W.A. are putting on a dance in the hall on Feb. 3rd. Hot Dogs and pie will be part of the menu for lunch. A prize will be given to the best couple on the floor. Be sure and come to Spruceville on Feb. 3rd and watch your step and get some real Spruceville pie. More particulars later.

At the Avalon

"Love Me Tonight", a Rouben Mamoulian production, Maurice Chevalier's latest film, which plays at the Avalon, is a very peculiarly delightful concoction of melody and humor, in which the famous French singing star has one of the best roles of his career.

Maurice, of the fantastic romance which serves as a story, is a Paris tailor, intent on collecting a long overdue bill from the Vicomte Gilbert. But before that bill is paid, Maurice has posed as a baron, been the honor guest at the house of the Vicomte's uncle and won the heart of the beautiful daughter.

The famous Chevalier charm has never been more in evidence than in the role Maurice; nor has Jeanette MacDonald been more beautiful. Charles Ruggles as the Vicomte; C. Aubrey Smith as the Count; Charles Butterworth as the Countess; Myrna Loy as the Countess, and Elizabeth Patterson, Blanche Frederici and Ethel Griffies as the three aunts of the Princess Jeanette, complete the cast.

COMING: Marlene Dietrich in "Blonde Venus", Jan. 19, 20 and 21. Geo. M. Cohan in "The Phantom President", Jan. 26, 27 and 28.

CLAUDE ROWE HAS MOVED TO NEW PREMISES

This week, Claude Rowe moved his place of business from his old stand on Nelson Street to his new premises in the Curtis building just north of Jenkin's Groceria. This building was recently purchased by Mr. Rowe, and he has installed much new equipment and is now prepared to handle business for his customers. Mr. Rowe will be glad to see any of his patrons at his new stand, and will be pleased to show you around his most modern shop.

SUPPER AND ANNUAL MEETING

A 25c. Supper will be served by the Ladies' Guild on Tuesday, January 24th, at 6:15 sharp. Immediately following the supper at 7:00 p.m. the annual congregational and business meeting of St. Andrew's Church will be completed by 8:30 or sooner, thus giving those attending the meeting the opportunity. It is hoped that the importance of this meeting to every member, will be realized by the Congregation.

IMPORTANT BY-LAW CHANGES ARE MADE

Coal Dealers and Gasoline Stations Must Pay Heavier License Fees in the Future

Several important changes in the Town By-laws were approved at a meeting of the Council held Monday evening, January 9th.

In future all coal dealers will be assessed a license fee of \$25.00 which will permit the use of one truck for hauling. Additional trucks will be assessed \$20.00 each. Bona fide farmers hauling coal in horse-drawn vehicles will not be assessed. Dealers who pay a business tax to the Town equal to or in excess of the above license fee will also be exempt from the provisions of this enactment.

A Drayman holding a license issued by the Town and who hauls coal from points outside Town for delivery to residents of Lacombe shall be deemed to be a coal dealer, within the meaning of the by-law and shall pay the license fee imposed. Provided however that if such drayman pays to the Town a license fee of \$10.00 equal to or in excess of the fee imposed upon coal dealers, he will be exempt from such fee.

In connection with curb gasoline pumps, all existing curb gasoline pumps erected on the streets or sidewalks of the Town shall pay an annual rental of \$1.00 per pump. Any additional pumps erected after passing of this by-law shall pay a yearly rental of \$15.00 provided however, gasoline pumps erected in front of any bona fide garage capable of storing more than 3 cars and doing service and repair work in connection herewith, shall pay a rental of \$1.00 each for such pump or pumps.

A general revision of By-law 13 which provides for the licensing of certain businesses such as electrician, plumber, taxicab, etc., was approved. In future all individuals, firms or corporations whose business is subject to the payment of license fees and are assessed for business tax, shall pay the larger amount. If the license fee payable by him or them is greater than the business tax it shall be absorbed in the payment of the license fee and vice versa. In other words no individual or firm or corporation will be assessed twice for the same business, the lower assessment being absorbed by the payment of the greater.

These By-laws will become effective January 15th, 1933.

At the Avalon

"Love Me Tonight", a Rouben Mamoulian production, Maurice Chevalier's latest film, which plays at the Avalon, is a very peculiarly delightful concoction of melody and humor, in which the famous French singing star has one of the best roles of his career.

Maurice, of the fantastic romance which serves as a story, is a Paris tailor, intent on collecting a long overdue bill from the Vicomte Gilbert. But before that bill is paid, Maurice has posed as a baron, been the honor guest at the house of the Vicomte's uncle and won the heart of the beautiful daughter.

ANNUAL REPORT OF LADIES' GUILD

Splendid reports of the activities of the Ladies' Guild for the last year, were presented at their regular meeting held recently at the home of Mrs. G. E. Dolong. Ten regular meetings were held with an average attendance of 16. With a paid up membership of nineteen, the Guild has sponsored one Board of Trade Banquet, The Old-Timer's Reunion, a Silver Tea, Chicken Supper, Social a Silver Tea, Chicken Supper, Social Evening, and entertained the Choir, and the Ministers. The church was decorated and a new lamp procured for the piano. The sick, shut-ins and strangers were given much attention; there having been 372 calls made as well as 64 remembrances with flowers, fruit or cards. In addition to the 25 Christmas greetings were sent out, and 38 boxes containing Christmas Cheer. The latter included the "White Gifts" brought in to the Christmas tree, and the dolls presented by the C.G.I.T. girls. Some boxes of clothing were sent to the Relief Committee at the Town Hall, and some given to Rev. Riggs to be sent to the drought district of Saskatchewan.

The Annual statement follows:

Receipts:	
Balance forward	276.39
Fees	230.00
Collections	15.85
Banquets	234.25
Teas	14.80
Bank Interest	.96
Anniversary Cards	83.00
Hall Rentals	91.00
Bazaar Goods and Quilt sold	10.50
Sundries	7.15
Total	766.92
Expenditures:	
Light: Church \$97.10; Hall \$27.23	
Banquet expenses	64.33
Expenses Social Committee, including Christmas giving	36.70
Interest on Manse Mortgage	18.70
French	47.83
Fuel	83.00
Supplies	16.94
Cleaning and Renovating	104.87
Donation to Managers	50.00
Exp. of Anniversary Cards	5.00

Bal. on hand in bank	125.56
Total	766.92

ST. ANDREW'S CHURCH

Pastor—Rev. R. B. Layton.
L. D. Wright, G.U.E.C.C., Mus. Director.

Sunday, January 15

1:00 a.m. Morning Service and Sunday School.

Anthem: "Have Faith in God." (Roache).

7:30 Mission Band meeting.

12:00 p.m. Evening Service—Address by the Oxford Group Movement.

Young People's Meeting following the evening service.

Bible Discussion Group meets on Wednesday evenings.

The quarterly meeting of the Official Board will be held on Tuesday evening, January 17th.

The monthly meeting of the Women's Missionary Society will be held on Tuesday, January 17th at 8:00 p.m. at the home of Mrs. H. Trimble.

The regular meeting of the Young Women's Auxiliary will be held on Tuesday, January 17th at 8:00 p.m. at the home of Mrs. A. Gilmour.

Boyd Crocker is spending a few days at Calgary.

Mrs. W. Bauer has been visiting with relatives at Roseton.

The Burns Club held a very successful meeting at the home of Mr. and Mrs. Morrison. It was decided to go ahead with preparations for a Burn's night. The ladies are meeting this week to make final arrangements.

SPRUCVILLE BURNS CLUB

The Annual Burns Club Supper, Concert and Dance will be held in the hall on Wednesday, January 25th. A good programme is being prepared. Watch for further announcement.

WORLD HAPPENINGS
BRIEFLY TOLD

Alberta's sugar beet crop for 1932 is expected to yield nearly 50,000,000 pounds of sugar, a new record for the province.

Both houses of the Bahamas legislature approved the bill ratifying the agreement signed with the United Kingdom during the Imperial Conference at Ottawa.

Freedom for 1944 for the Philippine Islands was voted by the United States Senate in the face of warnings that President Hoover would veto the legislation.

Canada supplied 57.3 per cent. of United Kingdom imports of wheat during the month of October, 1932, or 11,204,629 bushels out of a total of 19,632,648 bushels.

Miss Agnes MacPhail, Progressive member of House of Commons for South-East Grey, will address the United Farmers of Alberta Convention at Calgary late in January.

Due to the fact that Easter falls much later in 1933 than it did in 1932, the next session of the Ontario legislature may not be called until late in February, Premier George S. Henry has intimated.

Dr. W. W. Yen, head of the Chinese delegation at Geneva, who played a part in the resumption of diplomatic relations between Russia and China, has been named Chinese ambassador to Moscow.

The New Zealand Government has decided to re-assume its liability in connection with war debt payments to Great Britain, which were suspended last year by the Hoover moratorium on inter-governmental debts.

Unofficial, but reliable reports obtained at Ottawa, are to the effect that the world economic conference will be held in April. It is understood that world powers have agreed to this date.

About forty per cent. of Germany's foreign obligations is held in the United States, the remainder being distributed among several countries. Her total foreign indebtedness is \$4,812,000,000.

Claire Kinsey Vance, 35, veteran air mail pilot, rode to a flaming death against the summit of Rocky Ridge, four miles west of Danville, California. His body was found in the charred wreckage of his plane.

Radio Sets in Canada

An Average Of 74 For Each Thousand Of Population

Canadians owned 770,436 radio sets in 1931, an average of 74 for each thousand of population, the Dominion Bureau of Statistics reports. There were 40 sets for each thousand people in rural centres, 90 in the urban.

Ontario with 106 led all provinces in the number of sets per thousand of population. British Columbia 75; Manitoba, 65; Alberta, 61; Saskatchewan, 60; Quebec, 52; Nova Scotia, 50; New Brunswick, 39; Prince Edward Island, 35; and Yukon, 17.

Compared to its population, Forest Hill, Ont., a suburb of Toronto, has the largest number of radio sets, followed by Medicine Hat, Alberta; London, Ontario; Hamilton, Ontario; Windsor, Ontario; Brantford, Ontario; and Victoria, B.C.

Here's a Suggestion

To Increase Circulating Credit Of Canada By Millions

Suggestion for saving the country: If every Canadian were to give another Canadian, for a Christmas present, an I.O.U. for ten dollars payable at Christmas next year, the circulating credit of the country would be increased by one hundred million dollars, at no expense to anybody. If every Canadian gave ten other Canadians, etc., etc., it would be increased by a billion dollars. And if every Canadian gave every other Canadian—but where's the use?—Toronto Saturday Night.

Some Linguist

A tourist agency inserted an advertisement for a guide who was required to escort parties abroad. A hard-up young man, who desired an easy position applied and was given an interview.

"Good morning," said the agency official. "Parlez-vous Français?" "—beg your pardon?" "Parlez-vous Français?" "—Ah—frantically sorry, but I didn't quite catch." "Do you speak French?" The young man smiled easily. "Oh, yes," he said, "fluently."

Eight Islands in Group The Hawaiian Islands number eight. They are: Hawaii, Maui, Kahoolawe, Lanai, Molokai, Oahu, Kauai and Nihoa. There are several other rocky islets in the group which are not recognized as islands.

A rubber company recently built its 200,000,000th tire. Of course the directors celebrated the occasion with a blowout.

More than one-third of the year is devoted to religious rituals by the Hopi Indians.

W. N. U. 1974

Question Is Unique

Manitoba Court Must Decide If Widow Is Unmarried Woman
"Is a widow an unmarried woman?" as contemplated by the Child Welfare Act. This interesting question will shortly be argued in the court of appeal, where the matter was carried from a judgment of Mr. Justice Adamson, who said she was not.

Annie Hawrysh, Sky Lake, Man., made claim to certain relief on which an "unmarried woman" would be entitled under the act. Actually she is a widow. The case came before F. A. Hamilton, sitting as a magistrate, but before the argument got fairly advanced counsel for the defendant raised the objection that the magistrate had no jurisdiction because the claimant was a widow.

A prohibition order was granted by Mr. Justice Adamson restraining the magistrate from proceeding further. From that decision an appeal is now pending.

Protection For Animals

Suffering Will Be Prevented When Men Become More Civilized

Aware that something like 100,000,000 four-footed animals a year in this country are killed for food, to say nothing of the millions upon millions of poultry, the following from the pen of Arthur Brisbane is what we have been saying for many years: When men are more civilized they will forbid, without anesthetics, the intensely painful operations performed on millions of young animals, with nervous systems fully developed, young horses, lambs, pigs, calves, all the suffering of vivisection, fur trapping, bull-fighting are as nothing compared with the suffering inflicted upon young animals in the course of commercial stock raising.—Our Dumb Animals.

Had Right-Of-Way

Bicycle Was Removed So Fat Man Could Use Walk

In his most august manner Judge Rowlands at Clerkenwell, England, recently ordered that a bicycle be removed from a walk between houses so that a fat man would not be impeded. The landlord of the fat man wheezed to court to tell the judge that it was either a case of getting wedged between the bicycle and the wall, or pushing the wheel before him so that he had the full width of the passage to himself, and then pushing it back again.

By Ruth Rogers

WHAT WEE PERSON WOULDN'T ADORE THESE DARLING ONE-PIECE PAJAMAS?

A happy wee model that will please the most fastidious little miss. It is one-piece at the front with drop seat back. Don't you think the Peter Pan collar and little pocket cute?

It is the most simple garment to put together. You can make it or a good quality fabric for a very small sum. Striped flannel is darling in pale to dark blue tones. Flannellets in pretty floral or gay dots is another nice scheme. Kindergarten prints in flannels or cotton are amusing.

Style No. 785 is designed for sizes 2, 4, 6 and 8 years. Size 4 requires 2 yards of 36-inch material in flannel or cotton (if preferred). Wrap coin carefully.

Our Bacon Export

Canada's Market Should Expand With New Preference Quota
So much has been said about the brighter prospects for increased bacon trade with Great Britain that it will be of much interest to know what amount of Britain's annual needs in this food item Canada has been supplying.

Hon. H. H. Stevens, Minister of Trade and Commerce, recently gave the following figures of bacon imports by Britain during the calendar year 1930. The United Kingdom imported the given hundredweights from the countries mentioned:

	Hundredweights
Denmark	6,117,000
Netherlands	842,000
Sweden	550,000
United States	479,000
Poland	485,000
Irish Free State	330,000
Canada	50,000

If the 2,500,000 cwt., constituting the preference quota provided in the trade agreements between Canada and the United Kingdom, is to mean more than merely a pretentious string of figures, there is one export market that should experience gratifying expansion.—Kitchener Record.

Theory Not Yet Proved

But Experiments So Far Indicate Colds Not Communicated

Speaking of jobs, consider that of common cold-catcher, at which Robert Hale, Jerome Hawkins and Rex Sinclair, who belong to the ranks of the unemployed, are working hard in the laboratory of the University of California. University scientists are attempting to determine the cause of that common and little-understood ailment, the cold.

"We've made the experiment before," Dr. John Lagon explained. It tended to show that people get colds from fatigue and atmospheric changes rather than from other persons. However, the theory is still unproven. "The room was kept at 70 degrees for eight days. On the fourth day we had a person with a cold spend 24 hours in the room. The ailment was not communicated to the men." From results so far, university scientists are inclined to believe people catch colds all by themselves, and that no one communicates them.

Modern "Enoch Arden"

Russian Worked On Own Farm To Be Near Wife

Stephen Astalos went home to Hungary to his own sorrow. Back in 1914, he was reported "Missing in Russia." When the years by which any word from him, his wife decided he was dead. She married another man. Astalos was not dead—only a prisoner in Siberia. Several months ago he came back to his native village to find his wife living happily with another husband.

Nobody recognized Astalos—the years in Siberia had changed him. He wanted to be near his wife and yet not disturb her peace, so he got a job as farm-hand on his own farm. For months he slaved as a hired hand on his own land, and gave full satisfaction. But one day he hanged himself, and papers found on his body told his story.

Stillness Necessary

New X-Ray Machine Takes Pictures At High Speed

When the X-ray man takes your picture, he doesn't say, "Look pleasant, please," but "Hold your breath." That is, ensure perfect stillness of the part to be radiographed. However, the request will soon be unnecessary. X-ray apparatus has been perfected which will deliver 1,000 milliamperes of current to the tube at a pressure of from 50 to 100,000 volts, and at a distance of three or more feet, radiographs of the heart and lungs can be made in 1-50th of a second. At this speed the picture will not be blurred, even if the patient is talking or laughing at the time of the exposure.

Can Afford To Smile

"Small-town stuff" has become a byword, applied contemptuously. But the man or woman in the small town who is making both ends meet and is laying by a dollar now and then can afford to smile audibly at some of the "big-town stuff" of these strenuous days. Some of the brightest men and women in the big cities today are products of the small town. "Small-town stuff" is that from which great men are made.

To Please The King

There is not a bare upper lip among the officers of the two regiments of Household Cavalry—the Royal Horse Guards and the Life Guards. The King, who is Colonel-in-Chief of the Household Cavalry, expressed the desire that the officers should wear moustaches. All who did not have them already, immediately began to raise them.

The trouble is that a man too often shows his worst side to his better half.

Cloth ordered recently by an English railway for its employees totaled 258 miles.

Do You Know?

THAT although the pelican (famed in prose and poetry) is generally associated in the mind with sub-tropical regions, it is to be found as far north as Southern Saskatchewan. Each year large numbers of pelicans migrate across the boundary to Saskatchewan and build their nests on the shores of the numerous lakes in that area. The photograph shows a pelican in the process of taking off from Last Mountain Lake, Saskatchewan.

Rocket Flight In Spring

Pilot To Descend By Means Of Separate Parachute

The world's first rocket flight with a human pilot directing and controlling the fiery space ship is now scheduled tentatively for next spring. Engineer Heinrich Nobel has plans ready for the construction of such a rocket. The rocket, which is expected to reach an altitude of about 3,000 feet, is to be returned to the ground by means of a large parachute that would itself automatically, and the pilot, after leaping out of the fiery sky ship, is to be brought down by a separate parachute.

The inventor claims to have solved the problem of the starting speed. His rocket motor, constructed in accordance with the backstroke principle, will work with a number of adjustable nozzles, making it possible for the pilot to regulate the velocity of the ascent. Aluminum will be used in the construction of the rocket, which will be driven by a mixture of diluted alcohol and liquid oxygen. The liquid fuel, however, will be converted into gas, which, expelled through the nozzles, will propel the rocket ship.

Chemists' Shops Are Venerable Institutions

Combined Age Of Seven Oldest In Stockholm Is 1,860 Years

The chemists' shops in Stockholm are venerable institutions, judging from a recently published report. The seven oldest shops in Stockholm have a combined age of 1,860 years, or an average of 268 years each. The oldest one is "The Lion," originally the drug dispensary of the royal palace, which has celebrated its 310th anniversary. It is an old tradition among the Swedish druggists to give animal names to their shops, which were a gift sculpture of their particular animal as a signboard. Thus, besides "The Lion," there is "The Raven," "The White Bear," "The Swan," "The Owl," "The Deer," "The Unicorn," "The Griffin," etc.

"Now, Sam," said the Magistrate to the colored prisoner, "I want you to tell me just how you stole that chicken."

"Judge," returned Sam, "I'd rather not. It ain't no time of life for you to take up such things."

POLICEMAN: "What's that, madam? This has rolled right down the hill with your Christmas package inside!"
AGITATED LADY: "Yes, and my husband's inside with them, too!"
The Humorist, London.

Population Of Berlin

Gradually Decreasing

Present Rate Of Loss Is About 50,000 Every Year

Berlin's population is decreasing at the rate of 50,000 persons a year. More people leave the capital every month than enter it, while the death rate is rising and the birth rate is falling.

The population of Berlin which extends over an area of 340 square miles, is 4,500,000, which is 50,000 less than it was in 1931.

No improvement is anticipated owing to the steady migration of the inhabitants. Last July 20,000 Berliners abandoned the capital, while only 13,000 made their homes within its boundaries.

If the present rate of loss is maintained there will be nobody living in Berlin in 83 years' time!

Greater London, with an area more than twice that of Berlin, had a population when the 1931 census was taken of 8,269,992, which is less than twice Berlin's figures.

In the ten years between the 1921 and 1931 censuses Greater London's population increased by 723,741, an average increase of 72,374 a year.

An Aerial Newspaper

Latest Bulletins Are Thrown On London's Streets

London's disagreeable winter weather has been found good for something. A newspaper will be "printed" on it. It is planned to project news articles on clouds from powerful searchlights. Advertisements are already being thrown upward in this manner, and the aerial newspaper plans to continue the "ads," sandwiching them between "news-stories."

Promoters of the sky paper do not fear that they will lack clouds, for the winter sky in London is seldom clear, and smoke clouds can often be used. For the best results the writing should be at an altitude of 2,000 feet, it is said.

Recipes For This Week

(By Betty Barclay)

COCONUT CREAM JUMBLES

3 cups sifted flour.
2 teaspoons baking powder.
1 teaspoon salt.
1 cup sugar.
2 eggs, well beaten.
1 cup heavy cream.
1/2 cup coconut, premium shredded.
Sift flour once, measure, add baking powder and salt, and sift again. Add sugar, then sift to eggs. Add flour, alternately with cream, mixing well. Add coconut. Chill. Roll 1/4 inch thick on slightly floured board. Dredge with sugar. Cut with large round cutter. Bake in hot oven (425 degrees Fahrenheit) 13 to 15 minutes. Makes 2 dozen 3 1/2 inch jumbles.

LEMON CREAM JUNKET WITH CRANBERRIES

1 package lemon junket powder.
1/2 pint milk.
1/2 pint light cream.
2 cups cranberries.
1/2 cup water.
1/2 cup sugar.
To make cranberry sauce: Boil sugar and water together 5 minutes. Add cranberries and boil without stirring until all the skins pop open (about 5 minutes). Remove from stove, and allow sauce to cool.
To make junket: Prepare according to directions on package, using 1/2 pint milk and 1/2 pint cream instead of 1 pint of milk. Chill in refrigerator. Immediately after the junket sets, when ready to serve, put 1 tablespoon of cranberry sauce on each dish of junket.

How China Does It

Authorities Take Easy Way To Find "Lost" Articles

Anyone who has visited the east knows how easily property gets "lost." Lord Lytton discovered this when he was in China recently. But, being chairman of the Manchurian commission his property was speedily returned.

Lord Lytton lost his walking-stick. When he complained about it the Chinese authorities promptly put under lock and key every one of the carriers who had charge of his property, with the result that within two days a coolie brought in the stick and said he had "found" it.

Alaska's Air Success

Alaska is finding the airplane its most valuable means of communication, and aeroplane service in that territory is growing rapidly. Ernest Walker Sawyer, adviser to the secretary of the interior, reports that the territory's 26 commercial planes have 947,686 passenger miles during 1931. They carried 161,718 pounds of mail and express.

French angel fish, one of the most beautiful residents of the deep, can live but a month in captivity.

Photographs can be cleaned by wiping lightly with a piece of old linen dipped in warm ammonia water.

The cheetah is regarded as the fastest of all runners for any distance up to 400 yards.

Fruit Growing In Western Canada

Success Attained In Growing Apple On The Prairies

According to the Hon. Jas. F. Bennett, M.C., who is in charge of the Saskatchewan Government fruit growing campaign, a great deal of interest is being taken by farmers and particularly by their wives, in the prospects of growing fruit on their own farms, and many inquiries are being made by those who are following the Government lead in the matter and are desirous of establishing an orchard of their own without further delay.

A great deal of success has been achieved in the growing of crab-apples, plums and the smaller fruits in many parts of Western Canada, and good results have already been obtained in growing standard apples in certain locations in Saskatchewan.

In 1887, Experiment Station No. 1 was established by the Federal Government at Brandon, Manitoba, and under the leadership of Dr. H. H. Bennett, the first standard apple trees were planted out and tested under varying conditions but in no cases were any fruits produced.

In 1887 seed was obtained from the Imperial Botanical Gardens, St. Petersburg, Russia, and from the Siberian apple, known as the "Berried Crab" or "Pyraus Baccata." Trees raised from these seeds proved hardy in Saskatchewan. During the next eight or ten years more than two hundred of the hardiest sorts of cultivated apples, obtainable in northern Europe and northern Asia, were planted out and tested under varying conditions but in no cases were any fruits produced.

In March, 1911, over twenty-one years ago, William Saunders, Director of Dominion Experimental Farms, said in a letter to the Minister of Agriculture: "Already many useful varieties of cross-bred apples have been produced, and the indications are that improvements in the size and quality of the fruit will be more rapid in the future than they have been in the past. The large number of second crosses now under test will still be expected, furnish material among which suitable sorts may be found which will grow in Ontario, mercurial value in most of the colder parts of Canada."

The expected improvement has taken place. In addition a great deal of success has been attained by grafting standard apple wood on Siberian crab root stock. In 1921, 1922 and 1923, such pioneer fruit growers as Dr. Hunt of Indian Head, H. F. Foster of Maple Creek, in Ontario, have been raising standard apples in Saskatchewan.

A few days ago I received a letter from Frank Boskill, a farmer at Rutland, Saskatchewan, which indicated that on his farm over two hundred miles north of the international boundary and near the western boundary of the province, he had grown fruit successfully. Boskill wrote of this year's crop, in his orchard of about two acres:

"We kept accounts of the yield of the fruit from the trees at the following prices: 50 cents a pair for crab, 65 cents for hybrid plums, and 25 cents for standard native plums. The book-keeping stopped at 3,854 pounds when we started threshing. At that time there was easily 1,000 pounds sold after that besides what we used. Visitors seemed to get quite a kick out of picking the fruit and orders for plums were still coming in long after they had all been picked. Other years we charged one dollar a pair for plums, so it can be easily seen if times were normal, there would be money in fruit growing here!"

"We had wealthy apples 3 1/2 inches in diameter and standard than I ever saw the apple anywhere else. The green striped apples, the Doc apple, and a Hibernal and some of these were about as large. The Yellow Transparent is a good size too but the rest would not be much over two inches in diameter. It looks this last few years almost like we could bank on standard apples but I believe the seedling Russian apples will prove a good thing when we get a test-year. I also believe a little extra water at just the right time will help."

Here is an example of around two tons and a half of fruit grown on a little over two acres orchard in north central Saskatchewan.

I asked Dr. MacNeill, Superintendent of the Battledore Mental Hospital to visit the Boskill farm with his head gardener. He did so and speaking of the new orchard on the Battledore Institutional Farm, he said: "You supply us the material. We will supply the enthusiasm."

Canadians Like Radios

In 1931 Average Was 74 For Every Thousand People

Canadians owned 770,436 radio sets in 1931, an average of 74 for each 1,000 of population, the Dominion Bureau of Statistics reports. There were 46 sets for each 1,000 people in rural centres, 90 in the urban. Ontario, with 106, led all provinces in the number of sets per 1,000 of population. British Columbia followed with 95; Manitoba, 65; Alberta, 61; Saskatchewan, 60; Quebec, 52; Nova Scotia, 50; New Brunswick, 39; Prince Edward Island, 35, and Yukon, 17. Compared to its population, Forest Hill, a suburb of Toronto, has the largest number of radio sets, followed by Medicine Hat, London, Toronto, Hamilton, Windsor, Ont., Brantford and Victoria.

The cost of living in Germany continues to drop.

HEART OF THE NORTH

BY WILLIAM BYRON MOWERY

CHAPTER III—Continued.

Down in Ontario, debating what path to take, Joyce had thought of asking her dad to come and live with her. From a money standpoint, considering her good salary, that was the sensible thing to do. But she had chosen to return here. At that time she had fully realized the secret and irremediable reason of her return. If anyone had told her that reason, she would have denied it hotly. But now, face to face with a personal tragedy which forced her to dislodge her thinking, she looked into her heart and saw there the real motive. It was Alan Baker who had drawn her. By degrees unknown, unperceived by her, girlhood friendship had deepened into love.

She had come back to be near Alan Baker. She had come back in the passionate hope that he and she would marry.

There had been an unspoken understanding between herself and Alan that when the road ahead was a little clearer for both of them, they would be married. And then Elizabeth had come. . . .

Alan's engagement to Elizabeth had been a dazzling unexpected blow. When Bill, coming back on patrol, awkwardly blurted out the news of it, she had not believed. It took days of racked wanderings in the woods, weeks of hopeless anguish, to realize the truth.

For Joyce's sake he tried to lie convincingly. "They may not meet him at all, Joyce. And if they do, why they'd hardly stop a man down here. If for no other reason, it's because they're not the kind to let anybody go past alive and report their whereabouts."

For Joyce's sake he tried to lie convincingly. "They may not meet him at all, Joyce. And if they do, why they'd hardly stop a man down here. If for no other reason, it's because they're not the kind to let anybody go past alive and report their whereabouts."

When she thought of all these things and remembered how intimate and comradely she and Alan had been to one another, Joyce could not kill her lingering hope. As she stood there at the landing, now, awaiting the patrol, with her heart thumping at the prospect of seeing Alan and talking to him once more, she knew that tonight she would come a little closer to discovering whether her wild guesses were truth or only wishful hoping.

Down the river a great yellow eye blinked through the trees. Swinging around a bend, it played up above the water. In a few moments more it picked her out, there on the landing; and Joyce stood bathed in the blinding shaft of the launch's searchlight. The craft came on and on until she was within a few feet of the launch, where she stepped back a little, where she shadowed a low-sweeping balsam veiled her face. About the only ray of pride left to her was the fact that Alan Baker did not know or remotely guess her heart toward him.

With his first question, after their warm handshake, he asked her: "Has anybody passed here lately, Joyce?"

"Not that I've seen. Nobody in the last four days."

"But surely they did! Were you here all day?"

Joyce noticed then a tautness in his voice, and she saw that he had brought five men with him on this patrol. It was no routine work, no ordinary pursuit, this time.

She answered: "I was out hunting this morning, and I slept a couple of hours this afternoon. They might have passed then. But they couldn't have gone by while I was here and away."

"What time were you asleep this afternoon, Joyce?"

"I can't exactly say. . . . our clock says . . . Probably from about four till six."

Alan turned to Hardcock. "Bill, you heard what Joyce said? They

But she and Alan were not of one mind. If he really loved her, deeply and passionately, would he be so reluctant, would he allow anything on earth to come between them?

Joyce dared not ask him anything further then; he might add a word that would destroy this new-born hope. But a hundred thoughts were running wild through her. . . .

"Suppose he doesn't yield to Elizabeth! Suppose he won't go! Then she won't marry him! He'll throw him over for Hardcock! That's what she'll surely do. Bill says she and Hardcock are together half the time Alan's away from Lacombe. Isn't that the reason?—she's not sure of Alan yielding; and if she can't have her way with him she'll like to be an enemy's wife!"

With swift, unerring insight Joyce saw the all-crucial question: Would Alan get out of the Mounted? She was still uncertain what he truly felt for Elizabeth, but from his own lips she had learned one thing which she was sure she had never heard before. The marriage was not sure; it might never be!

In her abjectness she whispered to herself: "I don't care if he does like her. I don't care if she does like him. I don't care if she throws him over, then we'll be friends again, then he'll come to me again; and then—after that—"

To Be Continued.

Canadian Radium Available

Great Bear Lake Resources Will Supply Canadian Demand For Radium

Several grams of radium, which have been extracted from pitchblende taken from the deposits at Great Bear Lake, North West Territories, will be made available by chemists of the Canadian Government Department of Mines early in 1933.

Under a new process of extraction developed by Canadian Government chemists the pitchblende is concentrated to one part of radium in one hundred thousand, the best record made by any country by a very high margin. This concentrate is virtually free from all other impurities save barium and represents 95 per cent of the radium in the original ore. After the Canadian concentrate has passed through the refinery the radium will be 98 per cent pure.

By the new Canadian process the time involved in the production of radium concentrates containing 96 to 98 per cent radium will be three months instead of six months as in the case of other processes.

Speaking of the new Canadian process, Mr. A. Gordon, Canadian Minister of Mines stated that: "Fortunately for the new field and fortunately for humanity, the Canadian process we believe will permit as great if not a greater percentage of recovery involving a shorter time and less cost than the old process. It is a new, known method. I have every confidence that Canada will be able to supply not only our domestic needs of radium for therapeutic, scientific and industrial purposes, but will be able to enter world markets."

One Way To Propose

African Hotentot Throws Goatskin Sandals At Girl Of His Choice

Love-making among the Hotentots in southwest Africa is no "hot-and-cold" affair, according to Rev. Fr. Wenceslaus Rehor, Catholic missionary, who has lived among them for eleven years.

Rev. Rehor described their customs and superstitions during a visit in Cleveland, Ohio.

When a young Hotentot wishes to marry the choice of his heart, he throws his goatskin sandals at her. Rev. Fr. Rehor said: "If she survives the force of the throw, they break a stick together and each takes a half. After that they do not communicate with each other until the wedding ceremony of eight days is over. They speak only through a third person.

The groom, in preparation for the wedding, kills one of his best cattle. That meat is eaten at the feast by only the bride's relatives. To even matters, the bride's family kills one of its fattest cows, and the groom's relations feast on the meat.

The bride must have a dowry. If she is poor, she brings her husband perhaps 10 or 20 goats. If she is wealthy, the dowry might be as high as 300 goats and 10 cows.

Wield Enormous Power

Papers In Britain Have 700,000,000 Circulation In Week

Walter Rummen, president of the Board of Trade, as the chief guest at the 100th festival dinner of the Printers' Pension Corporation in London, England, spoke of the influence of the newspapers. He said he had been told that the circulation of papers published in England ran into the region of 700,000,000 a week. He had long since come to the conclusion that the powers of the newspaper world were more autocratic than those of anyone else in Europe.

Club Bore: "Is the seat next to you reserved?"

Member: "Yes. In fact, I am happy to say it hasn't said a word since I've been here."

An auctioneer's widow, Mrs. E. M. South, has been elected mayor of Stafford, England.

A Remarkable Carving

Ornitho Beasts Made From Walrus Tusk By Eskimo

Armed with carvings one of the most intricate and unique pieces of Eskimo walrus-ivory carving, Henry Abbey, engineer in the employ of the Dominion Department of Railways and Canals, returned to Regina after spending the summer and fall in the Arctic.

Work of Pseemo Kruakik, who died two years ago at the age of 60, the carving, according to George Kidd, resident engineer at Churchill, is one of the most remarkable pieces of work ever seen at Churchill.

The whole work, carved from a walrus tusk, is a carving of a board, made from a design obtained by this old Eskimo. It is a carving of a board, made from a design obtained by this old Eskimo. It is a carving of a board, made from a design obtained by this old Eskimo.

On the larger end of the tusk is a small compartment carved out of the ivory to hold the ivory-carved carvings, with the head of a crocodile, a native of the Arctic, on the sliding lid. On the smaller end of the tusk are three carved figures, that of the northern diver carved in ivory, with slate inlay, the Arctic fox, and the head and shoulders of a walrus, all carved in ivory with slate inlay. The main part of the board itself is decorated round the edges with a scroll carved into the ivory.

Abbey obtained the carving from an Eskimo, son-in-law of the man who did the carving, while he was on Spencer Island, 350 miles north of the Arctic circle. Only from 35 to 40 Eskimos live on the island.

The son-in-law of the old carver is a trapper and lives north of the Arctic circle in the winter time and in the summer comes south down to Churchill with a boat where he is frequently employed by the Hudson's Bay Company, and sometimes as an interpreter for the Hudson's Bay Company at Chesterfield Inlet and other Hudson Bay ports.

Chinese Physician Is No Longer Ridiculed

Native Actors Have Banished Ancient Stage Customs

The Peiping Chinese Actors' Guild has advised its members that henceforward the physician will not be personified on the stage by the clown or comedian.

This decision represents a victory for the native doctors in their long fight for the rectification of a century old slur on their profession.

The medical profession in China has always been held in high esteem, but it appears to have been an unwritten law of the native theatre to use a clown or comedian to play the role of the physician whenever a Chinese drama has such a character.

Through the influence of Mei Lan-fang, the famous female impersonator, one of the oldest customs of the Chinese stage has been changed.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little one of suffering and made them healthy.

French Officer Grateful

Sends Present To German Who Rescued Him During War

After 15 years a hand has stretched across no man's land to drive the way of honor from the door of Hans Schultz, an unemployed laborer.

During 1917 Schultz rescued a French officer who was badly wounded. They exchanged letters as the Frenchman convalesced in a hospital. Schultz, who has been without work for eight months, recently received a letter from his French friend who thanked him as a "Christmas present."

The officer explained he had just run across the German's name in an old diary and wanted to renew the friendship.

High Cost Of Ignorance

What World Is Principally Suffering From Today

The high cost of education is causing considerable concern. The editor of the Oakville, Ontario, Record, wonders why, at a time when the world is suffering principally from the high cost of ignorance, the cost of the most learned men and women learned what they know at least cost than is involved in the turning out of a high-school pupil who may, or may not, be able to spell.

Lumber Output Assured

The forests of Nova Scotia are estimated as being capable of furnishing annually in perpetuum 200 million board feet of softwood lumber, 100 million board feet of hardwood lumber, and 30 million cubic feet of pit props and cordwood.

Canned goods imported into England in the last year were valued at \$350,000,000.

Coffee is not native to South America. It is supposed to have been discovered in Abyssinia.

Tragic Story Revived At Paris Exposition

Precious Relics Of 18-Fold Napoleon Being Shown

The memory of Napoleon and his blinding epoch forever is being revived at Paris. This time it is the Napoleonic Exposition in connection with the centenary of the king of Rome, about whom the drama of L'Aiglon has preserved the tragic story of the great emperor's dynastic hopes.

The exposition is being held in the restored quarters of the Tuilleries Gardens. For weeks, cases arrived under guard containing the precious relics of the ill-fated prince. Museums and private individuals have loaned their mementos of the young Bonaparte, who, among his titles, was known in Austria as the Duc de Reichstadt. The sovereigns are in charge of the Baronne and Baron Jean de Bourgoing, who were designated by Count Clausel, French minister to Austria.

The exposition includes objects arousing memories for those who still remember the Napoleonic legend. Among these is the little gilded carriage of the King of Rome; the large arm chair in which the Duc de Reichstadt passed his last days on the terrace of Schonbrunn; the prince's hat, in the form of the hat of his illustrious father; his seal; his desk; his last pen. There also is Marie-Louise's jewel case; her portrait by Gerard, and many beautiful miniatures, engravings and other personal objects connected with the early days of the little king.

A Satisfactory Answer

Alberta Girl, Once Tiniest Baby, Now Big and Strong

What becomes of "tiny" babies? Do they ever grow up to be healthy and strong? Here is the story of one of the smallest babies ever born, today one of the brightest normal girls in the province of Alberta.

Orva Mary, daughter of B. McNeill, Standoff, Alberta, weighed just 12½ ounces at birth. She was wrapped in cotton and silk under a glass case for many weeks and fed with a medicine dropper—a drop of food at a time. She was bathed in oil and kept at an abnormally high temperature.

Later a cigar-box was her crib and cradle. Clothes she first wore later did service for her dolls.

When she was born, on Nov. 19, 1918, the doctor said she would not live. Today, she is obedient and happy, and takes a motherly care of the younger ones.

The True Gentleman

Archdeacon Scott Supplied Example For Students To Follow

Venerable Archdeacon Scott of Quebec, in addressing a body of students, stressing the necessity of being true gentlemen, drew from his pocket a well-worn New Testament, and emphasized his point by substituting the word "gentlemen" for the "charity" in St. Paul's famous chapter: "A gentleman suffereth long and is kind. A gentleman envieth not. A gentleman vaunteth not himself. A gentleman is not puffed up. A gentleman doth not behave unseemly. A gentleman doth not seek his own. A gentleman is not easily provoked. A gentleman rejoiceth not in iniquity, but rejoiceth in truth." The same may be truthfully be said of a true lady.

Children Reading More

Statement Of London Librarian Is Matter Of Satisfaction

Children of today have the library habit and read more than was the case twenty years ago.

This opinion is given by a London librarian, and few will challenge it. But is it a matter only for satisfaction?

Nobody would be foolish enough to deny the value of books to children, but there is a danger today that our young bookworms may become a little too studious.

An occasional low game of cowboys and Indians—or is it gangsters-and-cops nowadays?—will do a boy quite as much good as the most improving book ever written.—London Sunday Pictorial.

Irish Consider Debits

Dublin, Irish Free State.—Immediately after the debt assemblies on February 1, the De Valera government will propose legislation for repayment, at the rate of \$1.25 on every dollar borrowed, of the Irish Republic loans raised in the United States in 1918 and 1920.

A Real Asthma Relief. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements. Its claims are conservative indeed, when judged by the benefits actually performed. Expect relief and permanent benefits when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so-called remedies have utterly failed.

Helium From Lithium

Disintegration of lithium atoms at the rate of approximately 100 a minute thereby transmuting crystals of this lightest of all metallic elements into helium was described at Pasadena, California, to the American Physical Society by Dr. M. Stanley Livingston and Prof. E. O. Lawrence, University of California Physicists.

Only Two Icebergs Seen

Hudson Straits Safe For Navigation During Whole Season

Five steamers started grain over the Churchill route this summer without even having insurance. They experienced no trouble and saw no icebergs. During the entire shipping season only one iceberg was sighted in the straits besides the one struck by the "Bright Fan."

Such was the statement of Henry Abbey, engineer in the employ of the federal department of railways and canals, who spent the summer and fall in the north.

He stated that Captain Pools made a trip on the "Ocean Eagle" up to the Foxe Channel and the Foxe Basin before navigation opened up, to see if there would be any ice coming down that would enter the Hudson Straits in the latter part of August. On this trip north he discovered that the ice had all gone out of the channels, leaving the straits open for safe navigation. He so reported to the government.

Mr. Abbey also stated that only one iceberg was sighted by the French boat "Stereoc," the first boat to enter Churchill Harbor for the navigation season.

Mr. Abbey is very enthusiastic over the feasibility of the Churchill route.

THE RHYMING OPTIMIST

By Alice Michaels

AT NIGHTFALL

The black gale threatens; fierce and shrill
Are its refrain.
And angrily down field and hill
Its voice complains.

The wind grows louder now. With storm
Comes dusk today;
Only the arms of love can charm
My fears away.

Only the arms of love to hold
Me warm and near;
The tender arms of love, to fold
All sweetest here!

About me friendless lands are laid
A wild wind's stress,
While ever bolder creep night's shade
And loneliness.

No warriors' ranks, no monarch's might
Could make fear cease;
Love's arms, alone, can vanquish
Night
And bring me peace!

Buffalo For New South Wales

Government May Ship Specimens From Walworth Park For New Zealand Zoo

Canada has offered specimens of the far-famed Canadian buffalo to New South Wales. The desire of the Antipodean Government to build up the Tarango Zoological Park Trust in the New Zealand province recently was made known to this Dominion. The offer of Sir George Peck, acting prime minister, followed.

One Canadian buffalo bull and two cows comprise the offer. The specimens would come from the Buffalo Park at Walworth, Alberta.

If the offer is accepted, specimens of mammals or birds indigenous to New Zealand may be shipped to Canada.

Wheat Market Competitors

Australia and Argentina Are New Marketing Their Crops

Marketing of southern hemisphere crops says a wheat review of the Dominion Bureau of Statistics, will materially change the general situation that has existed since the beginning of the present crop year. Since August 1929, Canada has pretty well dominated the world export market.

For the balance of the crop year, Canada will have two important competitors, Australia and Argentina, in the wheat market, assuming that the United States will not greatly change its present relationship to external markets.

Exact Heavy Toll

A toll of 35,000 deaths and injuries to more than 1,000,000 people was exacted by traffic accidents in the United States during 1931. The National conference on street and highway safety estimates the economic loss of the accidents, together with traffic congestion, at more than \$3,000,000,000.

Music Resemblance

A striking resemblance between the music of the Athabasca Indians and that of the Chinese has been discovered by Dr. Marius Barbeau of the archeological department of the national museum of Ottawa.

Sign Of Prosperity

A Seattle girl claims to have received 100 proposals after offering to marry any man who had \$2,000. This goes to show that there are still that many men who have \$2,000.

At a compulsory auction in Hengsheng, a Baltic resort, recently, a hotel was sold for \$125,000.

The climb of an aeroplane is approximately from 400 to 1,200 feet a minute.

There are 209 rooms in Buckingham Palace.

Little Helps For This Week

"Strengthened with all might, according to his glorious power, unto all patience and long-suffering with joyfulness."—Colossians 1:11.

God doth not need
Neither man's works nor his own gifts;
Who best
Bears His mild yoke, they serve Him
best; His state
Is kingly; thousands at His bidding
stand;—
And past our sordid loves and claims
They also serve who only stand
and wait.

—J. Milton.

We cannot always be doing a great work, but we can always be doing something that belongs to our condition. To be silent, to suffer, to pray when we cannot act, is acceptable to God. A disappointment, a contradiction, a harsh word, an annoyance, a wrong received and endured as in His presence, is worth more than a long prayer, and we do not lose time if we bear its loss with gentleness and patience, provided the loss was inevitable and was not caused by our own fault.—Fenelon.

World Must Learn Lesson

Nations Not Yet Willing To Live Simply And Act Sincerely

His Honor Judge Stone of Sault Ste. Marie expressed some honest truths the other day in discussing world affairs. "People must live simply, and act sincerely," he said applying his remarks to nations as well as individuals.

On the same day as Judge Stone was speaking, Principal Pyra of Queen's University was telling a Sault audience that "we are nearer to another world war than ever before." Many responsible observers share that view.

The world has not learned its lesson. It is not willing to "live simply and act sincerely." Nations are still trying to sell as much as possible and buy as little as possible in return. They still try to get rich quick at the other fellow's expense.

Prospectors Stake Claims

Ottawa Reports Great Activity In Great Bear Lake Area

According to reports reaching Ottawa, a great many mineral claims have already been staked in the area adjacent to Great Bear Lake, Northwest Territories, and there is every likelihood that many more will be staked this summer. Some prospectors have already gone in by aeroplane and others are planning to go in by water transport as soon as the ice goes out. In view of this great activity the topographical survey, Department of the Interior, Ottawa, has reprinted the manual respecting the survey of mineral claims in Dominion lands for the use of Dominion land surveyors who may be called upon to make official surveys of these claims.

Radium In North

Two Grammes Of Precious Mineral From Great Bear Lake District

Two grammes of radium have been extracted from pitchblende found in the north country around Great Bear Lake and will be placed on the market soon, the first Great Bear Lake radium produced. This is the report brought to Calgary by H. B. Montgomery and Pete Davidson, prominent northland prospectors, who have just completed months of work at Great Bear Lake silver and pitchblende fields.

Good Number Qualified

Two great-grandmothers and 84 great-grandmothers attended "Great-grandmothers' Day," held recently in Melbourne, Australia, by the Carlton Methodist Mission. Only great-grandmothers "and up" were invited. "Senior member" was Mrs. Keegan, a great-great-grandmother of 90. One of the proudest was Mrs. Hopkinson, aged 77, who has had 29 children.

Glass Made Of Wood

Glass, unbreakable, even under hammer blows, a non-conductor of heat and cold, is now being made of wood at Portland, Oregon. Its installation is expected to effect a saving of 20 per cent in heating a home.

Keep Douglas' Egyptian Liniment handy. A sure, speedy remedy for burns, sprains, rheumatism, poisoning, sore corns, warts, acid feet. Invaluable for inflammation and muscular rheumatism.

A soil survey of Saskatchewan, which was commenced in 1921, is now nearing completion.

A ship's captain is empowered to conduct a marriage ceremony on his boat if the occasion arises.

H. A. Mackie, K.C. Enters \$26,000 Action for Libel Against Maloney

Two writs for libel, claiming \$26,000 against J. J. Maloney, lecturer and Imperial Wizard of the Ku Klux Klan in Alberta, and \$25,000 against Jim Bailey, South Edmonton, were filed in the Supreme Court today at the instance of H. A. Mackie, K.C., well known city barrister.

Mr. Mackie recently acted as counsel in a prosecution against Maloney, and alleged that at a public meeting in Edmonton on Sunday night, January 1, 1930, Maloney and Bailey made platform attacks upon his character in the presence of an audience of about 500 people.

The gist of the attack made by Bailey is to the effect that fifteen years ago Mr. Mackie had acted for a homesteader named Nash at Sturgeon Valley, Bon Accord, in a claim of \$20,000 land damages against a railroad and that "Mackie framed him and the homesteader in the end was sent down for six months for perjury." Bailey is said to have invited the audience to ask Mr. Mackie "where the three-quarters of land are now. Who owns them now. He does. That's Mackie for you."

Claiming that both references Bailey accuses him of criminal of-
fences, Mr. Mackie asks damages and an injunction to prevent their repetition.

The libels alleged to have been uttered by Maloney against Mackie are of a grosser and more personal character, and some of it of an unprintable nature.

Maloney among other things is said to have described the plaintiff as "Hell's Agent," as "a dirty, dyed-in-the-head lawyer, Mackie, paid by Roman Catholic and Hilliard Andrew's money to get (Maloney)."

Mr. Maloney is said to have charged as follows: "Mackie is that kind of a shyster lawyer that gets young women up in his office and makes them sign their names to letters on which are framed immoral charges against me (Maloney). Yes, makes them sign under threat of arrest."

"I have those letters, signed under threat of arrest."

For charges reflecting upon his moral character and for alleging he was endeavoring to secure a divorce of Maloney from his wife, the plaintiff asks \$1,000 damages and for the other alleged libels on his professional character he asks for \$25,000 damages.

Mr. Mackie has been in practice in the city of Edmonton since the year 1907.

He is applying to Mr. Justice Ewing for an injunction to restrain Maloney and Bailey from repeating their accusations against his personal and professional character.

POTATO GROWERS MEETING

The Annual Meeting of the Lacombe Seed Potato Growers Association was held in Lincoln Hall on

Monday evening, January ninth. The following officers were elected: J. A. Bradley, President; L. P. Oulton, Vice President; W. L. Ingemann, Secretary-Treasurer; J. A. Douglas, Edna Miller, E. H. Zetter, M. C. Bradley, Directors.

During the past year the Association has shipped two carloads of potatoes from Aspen Beach and a large amount of commercial potatoes were hauled by truck to western parts of the province before cold weather set in. The members have about two carloads of Certified Seed for shipment in the Spring.

LACOMBE HORSE SALE TO BE HELD MARCH 7 and 8

The Ninth Annual Horse Sale will be held at Lacombe on the above dates.

The Committee in charge are again bringing to the attention of all farmers the advisability of getting the horses they intend to sell up and fit them for this sale as it is the fitted horses that are in demand and bring the prices.

The previous sales put on by the Lacombe Farmers have proven a big boom to those who have horses to dispose of, besides being favored by the buyers who come west to get just what they want without the necessity of driving around the country.

It is expected that there will be the usual strong demand from Eastern Canada again this year for horses that are fitted and ready for hard work.

L. P. OULTON WINS SEVERAL FIRST PRIZES IN POTATOES AT EDMONTON

That high class potatoes can be grown in the Lacombe district was demonstrated by Mr. L. P. Oulton, at the Edmonton Seed Fair this week. Mr. Oulton won three first prizes and several other prizes. Mr. Oulton is to be congratulated on his good showing.

IN MEMORIAM

In memory of Mrs. Margaret Dwyer, who passed away Jan. 10, 1931.

"Just a sweet memory of days gone by."

A sigh for a dear face unseen:

A constant feeling that God alone

Knows best what might have been.

Dear is the grave where my darling

is laid;

Sweet is the memory that never will

fade;

The cup was bitter, the loss severe.

To part with the one I loved so

dear.

Laura and Nellie

Maintaining A Long-Established Position in Canadian Banking

When the Dominion of Canada was established in 1867, the Bank of Montreal, then already half a century old, had nearly a fourth of the total paid-up banking capital of Quebec and Ontario, and more than a fourth of the banking assets of those two provinces.

Today it has the same proportion of the capital and assets of the banking structure of the entire Dominion.

Today, as yesterday, it employs its resources and facilities for the upbuilding of the soundest elements of Canadian business.

Her Heart Was Weak

Nerves, Shaky, Nightless

Mrs. A. Black, Wallaceburg, Ont., writes: "I suffered from heart weakness, shaky nerves, and restless nights. I saw your advertisement for Miller's Heart and Nerve Pills and decided to try them although I did not have much faith, but now I am very thankful I did as they have proved of wonderful help to me. I am now strong and well again, but am never without a box in the house."

For sale at all drug and general stores; put up only by The T. Millers Co., Ltd., Wallaceburg, Ont.

Paying The War Debt

Great Britain's war debt to the United States was the subject of a recent article in this column in which it was pointed out that that debt was contracted by Britain, not to finance its own war expenditures, but in order to enable it to bolster up its Allies who had reached the end of their financial resources. The fact was further stated that the United States did not lend gold to Britain for this purpose, but extended credit for the purchase of supplies of all kinds in the United States, thus providing employment at high wages for United States workmen and producers, and very large profits to the people of that country out of the high war prices then prevailing. Attention was also drawn to the fact that, following the war, the United States insisted upon repayment of these credits in gold; that it refused to accept goods and services from Britain; and that, to prevent the possibility of repayment being made in goods it raised its tariff to prohibitive heights, thus largely shutting out British goods.

The further fact was noted that Great Britain had made a gallant attempt to meet all its obligations to the United States in gold, even under these almost impossible conditions, impoverishing its own people in so doing, and finally being forced to abandon the gold standard, while at the same time in order to prevent the complete collapse of Europe it agreed to practically wipe out all payments due to Britain by Germany. In conclusion, we submitted that the time had arrived when Great Britain, unable any longer to make payment in gold, should say to the United States that, while it was in no sense repudiating its debt, because of the impossibility of continuing gold payments it would refrain from making any further payments except in the same manner as the United States provided the credit, namely, in goods and services.

This particular article came to the notice of a paper published in Montana, which reproduced it in full, saying it was more moderate in its presentation of the British viewpoint than most papers, and that, in some ways the viewpoint expressed was reasonable enough but in other ways unintelligible to the U.S. citizen. Then, in a friendly way, this U.S. paper refers to the fact that "England seems able to devote some 400 millions annually to military purposes yet means pitifully at the thought of paying one-fifth of that sum on her debt over here. It then refers to France's expenditure of 541 millions on her war machine, Italy's 351 millions for a like purpose, etc.

One can, of course, appreciate this point of view on the part of U.S. people, but the fact must not be lost sight of that Great Britain has reduced her military expenditures to a greater extent than any other country; that, with a world-enriching Empire she is spending less, not only proportionately but actually, than the United States, much less than France, and that she is the foremost advocate of disarmament in the world today. Be it noted, too, that the one-fifth payment mentioned by this U.S. paper has to be made every six months, thereby making it equal to 10 per cent of the British military expenditures. Furthermore, the military expenditures do not have to be met in payments of gold, but in payments of thousands of soldiers and sailors, clothing, food and equipment for them, thus maintaining thousands of families that would otherwise have to be supported by relief expenditures. But Uncle Sam refuses supplies of any and all kinds and demands gold, nothing but gold, which Britain no longer possesses in the quantities required because it is now stored away in vaults in the United States and France.

This U.S. paper says further that people outside the United States are prone to forget that some years ago the United States scaled down the amounts due by all its debtor nations. True, but in the scaling down what happened? We have before us a statement of the amounts owing by all nations to the United States prior to the payments of December 18. It shows that Great Britain owes \$4,600,000,000 principal and \$6,505,965,000 interest. That is, in its bargain with Britain the U.S. is to collect interest nearly one and one-half times greater than the principal sum. In the case of France the U.S. asks only \$2,822,674,000 interest on a principal debt of 4,025,000,000, while in the case of Italy with a principal debt of \$2,042,000,000, the U.S. asks only \$365,677,000 in interest.

Or lumping all the debts together, the principal amount is \$11,522,354,000, of which Britain and France each owe approximately one-third, while the interest amounts to \$10,621,185,000, of which amount Britain is called upon to pay \$6,505,965,000, or over two-thirds of the total. Where, we always say, it will be asked, is the fairness in such a form of scaling down or of settlement?

Yet Britain is the one nation that is making the most determined effort to pay. It has not defaulted one payment, or one dollar. It has never even hinted at repudiation. All that was suggested in this column was that the United States give it a chance to pay in goods and services instead of gold, seeing that it is now utterly impossible to continue to pay in gold, always remembering that the United States did not lend gold to Britain but granted credits for goods and supplies of all kinds purchased in the United States, which business added enormously to the wealth of the people of the republic, and a goodly percentage of which was actually paid to the United States Government in the form of income and other taxes imposed on the wealth thus created by Britain's purchases.

If the United States objects to any revision of the debt refunding agreement made with Britain; if it still persists in a tariff policy which makes it impossible for Britain to pay in goods and services, and insists on gold nothing but gold, then, we repeat, Britain will be fully justified in withholding gold payments, which it is impossible for her to continue to make, and let the debt stand until such time as the United States changes its policy.

If one man owes another for goods he had obtained from him and found, owing to circumstances entirely beyond his control, that he could not pay in cash but offered to pay in goods or other property he possessed, then, even if a person would who the creditor should accept what his debtor was able and willing to pay; that it was the sensible, the business-like thing to do.

Defects In Modern Ships

Underwriter Lists Hazards In Address To Naval Architects

S. D. McComb, an underwriter of marine insurance, said before the Society of Naval Architects and Marine Engineers at New York, that there were unnecessary structural hazards aboard even the most modern ships.

He claimed the hazards included unnecessary door sills or door cuts that were too high, uncovered deck waterways and scuppers, faulty stair treads and stairs pitched at too steep an angle.

In 1931, he said, 3,307 accidents to passengers and crew were reported on 328 American ships. More than one-third of the accidents, he said, were caused by structural defects.

Apple Has Red Pulp

Congressman-elect F. H. Shoemaker, Labor-Liberal, after 12 years of amateur experimenting—burbanking as he terms it—in his back yard at Appleton, Wis., where he used to live, produced a russet apple with a red pulp.

World war widows in Europe have married again at an average rate of 2,000 a year.

Looking For New Job

Lord Mayor's Head Chef Has Enjoyed Year Of Hard Work

F. G. Bowles, chief of the Mansion House Kitchen in London, England, has defied his tail, while chef's hat and snowy coat and said goodbye to the Mansion House All through Sir Maurice Jenkins' year of office as Lord Mayor, Mr. Bowles has presided over the kitchen. "It has been one of the hardest and happiest years of my life," said Mr. Bowles, who is only 37, and is looking for fresh cooking words to conquer. He pointed to a 300-years-old table in the kitchen and to the huge coal cooking range on which, if need be, he can prepare meals for 1,000 people at once. The King and Queen have visited his stronghold of shining copper utensils and up-to-date cooking devices. "One of the outstanding events of the year," he said, "was when I made one of the biggest wedding cakes on record. This was for the wedding of the Lord Mayor's son. The cake weighed a quarter of a ton and stood seven feet high—much taller than myself. I used three-quarters of a hundredweight of sugar on it. It took most of my spare time for seven weeks." Mr. Bowles who is an expert in food, leaves nothing to chance. He buys everything, tastes everything, and anticipates everything—such as the unexpected addition of about fifty more guests to dinner. He thinks nothing of a little tea party of 400 people. In his spare time he thinks of new dishes.

Chinese Book Of Etiquette

Social Guide To Be Issued By Government

The Chinese Government has decided to issue an official book of etiquette to guide the people during these days of sweeping changes in the social system.

The Ministry of the Interior has taken the matter in hand, and several leading officials of the Ministry are giving the project their attention. An official of the Ministry explained: "The inrush of modernism has swept away many established Chinese social customs. Hybrid innovations have replaced them. There is no longer an approved 'right way' for doing anything. We propose, therefore, to standardize all important rituals, and to set rules for even the most ordinary salutations. We are sure the people will appreciate guidance in such matters."

Chance To Make Fortune

By Discovery Of Where Sprats Spend The Summer

Where do sprats go in the summer? There is a fortune for anyone who can find out.

Thousands of pounds have been spent by British Government departments and fishing companies in attempting to find where these little fish live during nine months of the year. "The man who finds the answer to the riddle will be a millionaire within a few months," said an official of the British Fishers' Association the other day.

"The sprat is found in British waters between November and February. Then he vanishes; no one has ever found him."

Know What She Wanted

Lawyer's Wife Gave Her Reason For Refusing Summons

The wife of a lawyer—a bride of three months—was somewhat surprised the other day when a stranger appeared at the door of her apartment and ascertaining her name, informed her that she had a summons for her.

"But I don't want any summons," protested the young woman. "It isn't a question of your wanting it—you've got to take it," said the process server, handing her the paper.

"But I won't take it," again protested the bride. "My husband's a lawyer, and if I want a summons I'll get him to give me one."

Starts Air Ferry Service

Air ferry service will connect the Isle of Wight with the mainland of England beginning this summer. Multi-engined "planes" will be used, and the trip will take only seven minutes. The airports will be at Ryde, Isle of Wight, and Portsmouth, England, and connections will also be made with London. Interchangeable air and rail tickets will be supplied.

Persian Balm is irresistibly appealing to all women who appreciate charm and elegance. Its use keeps the complexion clear, soft and beautiful. Tonic in effect. Stimulates the skin and makes it wonderfully soft-textured. Softens and whitens the hands. Persian Balm is equally invaluable to men as an excellent hair restorative and cooling shaving lotion. Splendid also to protect the tender skin of the child.

Manitoba imports more honey bees than any other province, the experience of apiarists indicating that it is profitable to obtain new bees each spring from a more southerly climate.

The hobby of Gar Wood, speed-boat racer, is raising turkeys.

W. N. U. 1974

WILL BRITAIN DEMAND DEBT PAYMENT FROM FRANCE?

SECRETAIRY HENRY D. STIMSON PREMIER CHARLES D. BRODEUR

The drastic action of the French Chamber of Deputies in refusing to pay to the United States the \$20,000,000 war debt instalment due December 15 may cause Great Britain to demand that France pay her debts to Britain. Both France and Belgium based their unwillingness to pay upon the refusal of the United States to consider revision of the debt question. At the League of Nations Conference Britain agreed to forget about war debts owing her by European countries if the United States would revise the war debt settlement and postpone the December payments, but Henry L. Stimson, Foreign Minister at Washington, ruled that the instalments be paid before the United States considered the revision. It is interesting to note that both French and Belgian Premiers and their respective cabinets, resigned, when their Chambers of Deputies voted to default. At the present moment our neighbors to the South are lauding the action of Premier MacDonald and the British Cabinet in paying the ninety-five million dollars due, claiming the French and Belgian debts defaulted were puny in comparison.

Where Mother-In-Law Rules

No One Disputes Her Supreme Authority In China

One thing about China is that they can't understand any of the "mother-in-law" jokes of the American.

It so happens that in the land where chop suey is unknown the mother-in-law is the head of the family, according to Magdure Maury, professor of journalism, and once connected with Chinese newspapers.

"The mother-in-law in China is the supreme master of the destinies of the family," said Maury. "She rules with an iron hand and plays an integral part in the social and business life of her son-in-law, which is a different picture we have of the American situation."

"China may be easily called the leader of the woman's emancipation movement, although it is usurped by our own members of that sex." Maury said. Chinese were not immoveably by passions. "Emancipation of the oriental is just as deeply moved by joy and tragedy as we are, but he shows it in an altogether different way. Their insurmountable countenance is just as readable as our beaming smiles can be to those who understand them."

Device Next Thing

To Perpetual Motion

Machine Produces Power Without Fuel Or Human Aid

The nearest thing to man's oldest and most futile dream—perpetual motion—was on exhibition at Grand Central Palace, New York, at the national exposition of power and mechanical engineering.

The machine produces power without fuel or human aid. Engineers said it was so near to perpetual motion that only an engineer could understand why it wasn't.

George H. Gibson, Philadelphia engineer, explained he "threw the machine together" in his spare time. The machine works on a thermodynamic principle, utilizing water and vapor to produce its power. The vapors are invisible so the machine apparently operates without a source of energy.

Engineers explained the chief reason it was not perpetual motion was that its parts would wear out and that it could be stopped.

A Regular House Dog

John Robinson of Leek, England, celebrating his golden wedding anniversary, said that keeping peace in the house had been no problem at all—he says home nights. For fifty years he has stayed home every night except one. "On that one night I sat up with a sick friend," he explains. He has never seen the sea or moved—too busy staying home nights.

Thankfully Received

Friend: "Why are you so jubilant?" Country Editor: "I just received another fine contribution from Farmer Brown's pen." Friend: "What! What was it?" Country Editor: "A fine fat pig on subscription."

Cotton and artificial silk material that cannot crease or wrinkle is now being made by a new manufacturing process.

A European naturalist declared recently that butterflies sing to their young.

Game Warden's Fish Story

Salmon On Flooded Road Made Him Stop Car

Game Warden C. H. Pike, of Vancouver, has a new fish story and he sticks to it. He says that while driving his automobile along the Howe Road, near Cloverdale, ten miles east of New Westminster, he had to stop to let a salmon pass.

"I was driving along in the flooded section of the road and noticed something moving in the water on the road ahead of me," related Pike. "I halted the car and waded along through the water to see what it was. Sure enough, it was a big salmon making slow progress along the road. When I saw me, of course, it spurted away, so I couldn't bring it home for supper—and evidence."

Thousands of acres in the Fraser and Serpentine Valley were under water as a result of recent floods. Mild weather melted the early snow in the hills and heavy rainfall in other sections contributed to the flow of water to the low land. Farmers in the Skagit River country, where roads in some places were two feet under water, are said to have made some good catches of fish in their hayfields.

Unexpected Game

Negro Who Went Turkey Hunting Returned With Feather

Alexander Glines, negro, of Everglades, Florida, will think twice before he goes turkey hunting again. He went out armed with a rusty shotgun to bag one for supper. As he approached the edge of a cypress swamp, he was suddenly interrupted by a scream. He turned around to look into a pair of blazing eyes that belonged to no turkey. "I was too scared to run, boss," he said later, "so I just pulled up my gun and let her go." The Negro did pretty well at that. He came back dragging a 110-pound pumper that measured 7 feet, 8 inches.

Material For Controversy

What Is Required To Make a Word Beautiful

Wilfrid J. Funk, poet, lexicographer and president of Funk and Wagnalls, New York, has listed what he considers the ten most beautiful words in the English language—"beautiful in meaning and in the musical arrangement of their letters."

Mr. Funk says: "Beauty of sound is not enough. 'Mush' is a word pleasant to the ear, but its connotation is ugly. Beauty of meaning is not sufficient. 'Mother' is one of our most loved words, but it lacks euphony." Here is material for a winter's controversy. It will probably start over the rejection of the word 'Mother.' Toronto Mail and Empire.

The Starting Point

Wheels Of Industry Keep Turning If Farmer Has Money

When money is tight on the farm, it is tight every place else. Goods refuse to move off the shelves of city stores, and at the same time causes a slackening in the pace of the wheels of industry. And then the city wage-earner becomes worse off than his rural cousin—he has no money, nor has he any pigs, chickens or turkeys. There was no truer word spoken than that farmers are the basic industry of this country. Put money into the pocket of the farmer and he will start the mill wheel turning.

Didn't Want That Beat

A young man from the country went to London to join the police force. He passed the medical examination, and then the officer in charge asked him if he had a good general knowledge.

"Yes, sir," came the reply. "Then how far is it from London to Edinburgh?"

"Look here," said the young man, "if you're going to put me on that beat, I'd rather stay home and help father with the chickens."

Gave Many Men Work

Seventy-two railway freight cars of Christmas trees were shipped in 1932 from Vancouver Island to all parts of the United States. Each car contained an average of 5,000 trees and it is estimated that the work of cutting, packing and loading trees provided 300 men with work, carrying a fair rate of pay.

Pensioners Must Stay Home

Retired German officials must stay in Germany if they wish to have their pensions. The government has informed those enjoying Mediterranean or other foreign resorts that unless they return within six months their pensions will be forfeited. The object of the rule is to help in preserving Germany's foreign currency reserves.

Newspaper Fans

The American people spend twice as much time reading newspapers as they do magazines, says the American Newspaper Publishers' Association after a survey. They peruse newspapers five times as much as they do books. We read newspapers on the average of forty-five minutes a day.

The National Society of Non-Smokers is being organized in Scotland.

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much inventive thought being given to eliminating unnecessary housework, it is only natural that a worthwhile substitute for the dusty dust cloth should be sought.

Now it has been found. Appleford Wonder Paper which actually dusters—sifts clean—as it polishes is receiving hearty welcome from Canadian women who detest dust cloths and all they stand for. Wonder Paper is made from clean rags and soft paper pulp, thoroughly impregnated with a high-grade furniture polish, and absorbs dirt instead of spreading it. Appleford Wonder Paper comes in handy-size packages, twenty-five sheets, each as large as a dust cloth. You merely crumple a sheet into a soft pad, and go over the surfaces requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and soiled simply turn the Wonder Paper inside out. After the furniture or woodwork has been gone over, you can still use your Wonder Paper on the floors.

And when you're through—throw it away. No dust to shake out or wash. No bother at all. The most obnoxious part of housework done in half the time and with half the effort. Doesn't the idea appeal to you?

Special Offer

Wonder Paper is made by the makers of the famous PARA-SAN heavy waxed paper in the Green Box. Most grocery, hardware and department stores sell Appleford Wonder Paper. If you don't, just send for a sample. We'll send you a new and unique booklet entitled "Lettovers," containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd., Hamilton, Ontario.

Enclosed find size of sheet please send me one full-size package of WONDER PAPER and your 100 recipes for Lettovers.

Wood Preservation Problems

Crescote Treatment Is Subject Of Investigation By Scientific Forces

With the increasing use of wood preservatives in extending the life of wood structures, problems are constantly being encountered the importance of which could not be foreseen in the early days of the development of this practice. One such problem is the "bleeding" of timbers after impregnation with crescote. By "bleeding" is meant the exudation of crescote to the surface of the timber, rendering it difficult to handle, and a menace to the wearing apparel of the workmen or others coming in contact with it. In the case of telephone poles on city streets "bleeding" may be a source of considerable annoyance. The Forest Products Laboratories of Canada, Forest Service, Department of the Interior, are investigating this problem and at present are causing a slackening in the pace of the wheels of industry. And then the city wage-earner becomes worse off than his rural cousin—he has no money, nor has he any pigs, chickens or turkeys. There was no truer word spoken than that farmers are the basic industry of this country. Put money into the pocket of the farmer and he will start the mill wheel turning.

Miller's Worm Powders will drive worms from the system without injury to the child. The powders are so easy to use that the most delicate stomach can assimilate them and welcome them as speedy easers of pain, because they promptly kill the worms that cause the pain, and thus the suffering of the child is relieved. With so sterling a remedy at hand no child should suffer an hour from worms.

Kootenay National Park

Wonderous Natural Beauty Proves Great Attraction To Tourists

Kootenay National Park, established to preserve the natural beauty of the area along the western part of the Banff-Windermere Highway, has many claims on the tourist. On each side of the highway nature's handiwork remains in all its vivid beauty. In the Sinclair section, where the motorist enters from the west, sheer rock walls coloured in places with a brilliant red as if artificially stained with pigments, rise from the little stream. Deer, bighorn sheep, elk, moose, and Rocky Mountain goat can be seen feeding fearlessly on the grassy slopes and practically every valley holds a sparkling lake or brook teeming with fish. At Sinclair are also the famous hot springs, renowned for the therapeutic value of their waters.

Many New Lines Of Inquiry Have Brought To Light Curious Facts About The Honey Bee

Among the many new lines of inquiry which are now being followed at Rothamsted, the oldest and best agricultural station in the world, is the life of the bee; and some very curious facts have been, if not freshly discovered, at any rate tested and illustrated. . . . The bees in every hive enjoy progressive employment. They begin as housemaids, they are promoted to be nursemaids and conclude as housekeepers, or at any rate as caterers. The system works very smoothly up to a point; so long as the promotions follow at decent intervals, all goes smoothly; the hive is at peace within itself and social service has no let or hindrance. Trouble makes its appearance only when the upper ranks are filled and promotion is blocked. Unrest becomes general. Revolt is threatened. Its rumors reach the senses of the queen. Perhaps she notices that her queens are being bred, it may be in numbers. So she decides to make the best of things, and seek a new kingdom. She collects an army, leaves the hive, swarms and takes her company to the new home that special pioneers have already been sent out to discover.

The early career is singularly uniform. First they hang about the comb from which they emerged, and spend their time in rather a lazy and desultory manner—in cleaning out the cells and making them fit for further use. As their food and capacity increase, and the instinct for flight in the open air develops, they advance to the work of feeding the grubs. As a rule they devote themselves chiefly to the care of the elder grubs when first taking up the new duties, not attending to the younger till later in their career. As the year advances each working bee becomes a Melliss; she devotes herself to the care of honey, to the making of cells and the collection of the nectar.

Now suppose the hive is not big enough to hold more comb, more honey, more cells; the season is unfavorable as to interfere with the storing; the system more or less breaks down. Promotion, as I have said, is blocked. An old Scottish philosopher used to say that reason is developed along the line of conflicting instincts. Bees do not presumably arrive at reason, but when the instinct for progressive work is checked they are driven to a new activity. It is at such crisis in the life of the hive that the large cells are built and grubs specifically fed for the creation of queen. It is in fact of this new fact that the old queen—not one of the younger products—nurses new migratory desires and inspires the company with a like zeal. It is now established that she has taken with her rather more of the younger than the elder bees, though her army is fairly representative, and the new swarm is believed to approximate the original swarm in number. Sir William Beech Thomas, in the London Spectator.

A Savage Practice

Civilized People Have Not Yet Learned To Be Quiet

In his description of the "Deserted Village," Goldsmith refers to "the loud laugh that spoke the vacant mind." When the poet penned that line there were no motor-cars cutting acute corners about the town, rending the air with piercing, nerve-racking sounds when forced to tarry a few seconds at some busy intersection. Such a concert of discord is said by the psychologists to be a sign of weak mentality.

Making a noise seems to be a savage practice, and with all our civilization we have not advanced greatly as far as turmoil is concerned. We have not learned the art of keeping still. We must be producing a clamor at all events. Perhaps the time will come when we shall grow tired of our noise and look upon it as an offense to public decency. Until then we who are wise must be patient and hope that the wisdom of the noisy may increase.

These Pools Are Hot

A geyser of steaming water, hot enough to boil corn-on-the-cob, has broken through the earth at San Juan Consals, a village on Lake Chapala, in the state of Jalisco, Mexico. Two streams are flowing into the lake from the new pool. There are similar pools about the lake which generate heat at times, and then gradually cool off and run dry. The district is subject to frequent earthquakes. World-Wide News Service.

Charges By The Minute

One barber of Miles, Mich., is charging by the minute for haircuts, as the result of a war. His rate is one cent for each minute the customer spends in the chair and he said that persons without too much hair to come off were paying as little as a dime.

A shoe manufacturer of Czechoslovakia, has opened 40 retail stores in Poland.

Leases In Bond Street

Queer Things Would Happen If Freeholder Exercised Might

A writer in the London Morning Post tells this one—I met a man today who has just been negotiating for the acquisition of some property in Bond Street. He told me that when he examined the draft lease he discovered to his astonishment that one of the clauses provided that he should give an undertaking to allow the freeholders of Westminster to drive their flocks and herds over the property "without let or hindrance." Similar clauses, I understand, are to be found in the leases of many of the properties in the neighborhood. It would be interesting to see what would happen if one of the freeholders of Westminster decided to exercise his right. The spectacle of some elderly peer attempting to drive a flock of rebellious sheep through the front door of a Bond Street beauty parlor could scarcely fail to be a diverting one.

What Insects Eat

Some Are Particular and Others Will Eat Anything

Grasshoppers are vegetarians, but eat almost anything that is vegetable; walking-sticks and crickets are as universal in their tastes as are cockroaches; that weird insect, the praying mantis, is an insect-eater, but will eat any insect—even her own mate. The solitary wasps, that provide for their young by leaving a sting-stung victim in the cell with each egg, are also specialists in the assassination, though here again we find degrees. Some will take nothing but spiders, others provision their nurseries only with smooth caterpillars. One species limits herself to queen ants, but there are plenty of wasps that will stab and drag home a wide variety of insects for larva-food.—London Tit-Bits.

By Ruth Rogers

A WHITE SCARF COLLAR THAT YOUTHFULLY BRIGHTENS A BLACK CREPE SILK DRESS

The round yoke and puffed sleeves do even more. They lend that smart totem influence so important this season. You'll agree it's adorably smart. Won't you? And note the youthful saum. It will cost you a very small sum to make. Geranium-red rough crepe silk with black trim, grey with brown and purple with fuchsia-red are snappy combinations.

Style No. 962 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Size 16 requires 3 1/2 yards 36-inch with 1/2 yard 39-inch contrasting. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap card carefully.

Must Be Kept Separate

Britain Will Discard Unemployment Insurance As Relief Measure

While unemployment insurance may prove of aid to persons who are out of work occasionally for short periods, the experience of Great Britain has made it clear that the plan is of no use in dealing with the problem of widespread and prolonged unemployment. This point has been demonstrated so conclusively, in fact, that Britain is preparing to separate her relief work from the insurance programme.

No insurance system, whether operated by the state or privately, can remain solvent when any considerable number of its policy-holders discontinue paying premiums and yet draw on reserves. And, unfortunately, persons who would be "non-contributing beneficiaries" if they were supported by insurance are the ones who are providing the biggest relief problem at present, in both Britain and Canada.

In these circumstances it appears that no country should initiate a jobless insurance plan, as a feature of its national policy, except in a period of relative prosperity. Those who need help most at this time would receive no aid whatever under an insurance scheme that was actually sound. Caring for such people is a big enough job, in view of the present limits on public and private relief, without trying to add the notion of providing a palliative in the interests of those who may, or may not, join the ranks of the jobless at some future date. The immediate necessity is to pick up those who have fallen, not to provide a cushion for those who may still conceivably fall.—Toronto Evening Telegram.

Quality Brings Price

Market Willing To Pay For Top Grade Cattle

Prices, at the present time, are low for many classes, and very low for certain classes of cattle. Every day stories are put into circulation to show that there is no money in the business of cattle production at the same time the fact that the market is willing to pay a handsome differential for the top grades and suitable weights, has never been more apparent. Two transactions recently completed on the Union Stock Yards, St. Boniface, Manitoba, are typical cases in point. A short time ago a part cartload containing 13 head of cattle comprising, according to the sales statement, "6 cows, 2 cattle, 2 steers and 3 bulls," a total weight of 9,850 lbs., was shipped to St. Boniface yards, from a station on south-eastern Manitoba. Two of the bulls were yearlings, weighing 480 and 520 lbs., respectively, and the remainder of the load were all very mediocre. This load sold for an average of under 75 cents per pound, a total of \$88.08, and from this had to be taken expenses of \$2.68 per head, a total of \$47.39, leaving to the shipper \$35.19 net.

On the same day there arrived a car of cattle from Nipaw, Manitoba, in which was a "red calf" weighing 960 lbs. in splendid condition. This calf sold for 7 1/2 cents per pound, a total of \$72. The expenses on this carload amounted to 38 cents per hundred pounds; thus the share chargeable to the calf was \$3.65. This left, for the shipper of the calf, a cheque for \$68.35 as the net settlement. The red calf was shipped 175 miles, the 13 cattle 115 miles.

Quite a contrast—\$68.35 for one animal compared with \$35.19 for thirteen. Quality is recognized and is paid for.

In Self Defence

Tenant—"I simply won't stay here any longer. Those people above me banged on the floor early this morning, slammed doors, and jumped up and down as hard as they could. I won't stand it, I tell you!"

Landlord—"They woke you up, I suppose?"

Tenant—"No, I hadn't gone to bed yet. I was practicing on my saxophone."

Delivers the Goods

Jacob Putman of Bellevue, Iowa, thinks he has the goose that laid the golden eggs, and here's why: Since last spring the goose has laid more than 200 eggs, and for 10 days in October averaged two a day. In addition, the goose laid 21 eggs while she was sitting on a nest during the hatching period. She started with a nest of 16 eggs, ended with a brood of 37.

The Last Act

"Why don't you attend church?" asked the minister of a non-attendant. "Well, I'll tell you sir; the first time I went to church they poured water in my face, the second time they tied me to a woman I've had to keep ever since."

"Yes," said the parson, "and the next time you go they'll throw dirt on you."

The oil of tomato seeds, when extracted, is used in the manufacture of fine soaps.

The Arabs of the Sahara desert in northern Africa is said to be more than 2,500,000 square miles.

A NEW SPORT IN THE MAKING

Here we see C. H. Lowe Wyld, prominent English airman, with the tiny engine he has designed to test the possibilities of light-aeroplane racing around pyons in the manner of dirt track contests. This engine is a two-cylinder, air-cooled, motor-cycle engine of 600 c.c. capacity or approximately 6 horse-power, normal rating. The machine weighs about 400 pounds. Mr. Lowe Wyld, one of the Mother Country's most famous glider pioneers, tried out his "plane" and it worked perfectly, so, all being well, we shall have aeroplane racing around the sport arenas of the world very soon, which may put automobile and foot racing out of commission for lack of thrills.

All In Knowing How

Many People Fall Great Distances Without Sustaining Injury

What is it that causes one person to suffer severe injury in a short fall and another to escape in dropping comparatively great distances? Perhaps it's all in knowing how to fall. In football games clever players have a certain way of hitting the ground when tackled that prevents the same faculty, when struck down on the stage. One reads of people falling several stories from hotel windows and escaping with minor injuries; while broken limbs or fractured heads are not infrequently caused by falls not greater than a man's height. Little tots and babies often get away without being hurt. George Dawkins, aged 17 months, fell from a second story window at his home, Hornell, N.Y., landing on his back, without an injury of any description. Such is the way of the world and although the sun shines on the just and the unjust alike, this doesn't always apply to the extent of injuries received by persons who fall out of windows.—St. Thomas Times-Journal.

To Facilitate Cattle Trade

Concessions Granted To Canadian Livestock Shippers

Concessions designed to greatly facilitate the shipment of live cattle to the United Kingdom have been secured by the Dominion which, in turn, will render it much easier for the English breeder of pedigreed stock to sell and ship high-grade stock to Canadian buyers. Fear of the dread foot-and-mouth disease, prevalent among English livestock, but practically unknown in Canada, has caused the Canadian government to set up rigorous regulations for the shipment of English livestock to Canada.

New telephones are being installed in England at the rate of 6,000 a month.

Authors Select Some Of Greatest Novels

George Bernard Shaw Names Doreen That He Fancies

"It's an unmanageable question," declared Bernard Shaw when asked by the magazine, "The Book Window," to name the 12 greatest novels. Nevertheless, Mr. Shaw names the following dozen: "Don Quixote," "Robinson Crusoe," "Tom Jones," "The Vicar of Wakefield," "Mansfield Park," "Ivanhoe," and "Rob Roy." "Little Dorrit," "Candide," "Gulliver's Travels," "Pilgrims Progress," "Les Misérables," "The Arabian Nights." "There you have a baker's dozen," declares Mr. Shaw. "You will easily get another 12 just as eligible."

Several novellists of note beg to be excused the task of naming the best 12. "It is like asking which is the greater work of nature, the shrewmouse or the elephant, the cedar tree or the violet," says H. G. Wells. A. S. M. Hutchinson confines himself to naming a single book "Tom Jones." So does G. K. Chesterton, who plumps for "The Canterbury Tales." Ian Hay starts with "Don Quixote," "Les Misérables," "Vanity Fair," and "Waverley," and then goes on with something of a jump to "Treasure Island," and "Huckleberry Finn." In his list are also included "Pickwick," "The Skipper's Wooing," "The Good Companions," and "Midsommer Night's Dream."

Canadian Apple Popular

Popularity of the McIntosh Red apples grown in Canada is evident from the fact that the whole of this year's crop grown in Western Canada has already been marketed. More than 365,000 boxes of these apples have been shipped to the domestic and export markets.

New Aid For Blind

Forty per cent of the persons now incompetent from blindness can be returned to normal occupations by the use of newly developed telescopic glasses. Dr. William Feinbloom, of New York, told the American Academy of Optometry at Chicago.

CANCER TREATED BY THUNDERBOLT

Above is the apparatus used in the most sensational experiment in the history of science, which was conducted recently in Berlin. The machine generates the synthetic thunderbolt with which scientists sent an electrical charge of 2,500,000 volts through the cancerous arms of a 55-year-old farm-hand, in an attempt to cure the disease. The fact that the subject of the "kill or cure" experiment still lives gives scientists hope for their success. Inset is Dr. Fritz Lange, who developed the apparatus, used for splitting atoms, which made the experiment possible.

Causes For Low Prices For Grain Are Reviewed By Prominent Western Grain Expert

Interesting Statistics

Facts About Canada and U.S. Which Many May Not Know

There are 7,512 Chinese laundries in the United States as compared with 1,624 in Canada. But it leads to a strange tale of statistics. There are 6,330 fur farms in Canada and only 1,273 in the United States, which is 13 times more populous. There are 23,345 banks in the U.S. and a vastly lesser number over here, but oh, how much more reliable they are! The Americans are much more particular about their appearance than Canadians, for there are 82,000 barber shops on the south side of the international line, while way up here in Canada there is only 4,121 parlors for creating that air of tonsorial elegance. And here's a not one for the young man who wants to get rich quicker than a tack can take the pride out of a balloon tire. There are 2,032 millionaire widows in the United States; out of a total of 10,135 millionaires in the land of liberty, 5,105 are interested in art and antiques. There are 2884 such lucky gentlemen in Canada, but we were unable to find out how many knew the difference between Salsmua and Wedgewood. On the other side there are 2,217 multi-millionaires and 387 with fortunes in excess of ten million dollars. Incidentally, there are 3,036 female millionaires in Uncle Sam's lot. Of the total of male millionaires in the States, 2,497 are of German descent and 16,352 have homes valued at more than \$50,000. The number of philanthropists in just any of the total number of millionaires, there being 19,117 who can be classified as such. There are more smokers in proportion in Canada than there are in England, there being 228 wholesale tobacconists operating under the Maple Leaf and only 496 selling under the eagle of the building, in spite of the fact that England alone is four times more populous than Canada. There are 1,853 daily newspapers in the United States, all operating in cities of 20,000 and over. A funny fact is that there are 744 quill pen makers in America and only 3,529 owners of quill pens in Canada. If a firm builds five yachts and sells them its sands are run and it might as well take up some other line of business.

"The price of wheat," continued Major Strange, "has seriously declined. Why? The simple reason is that the main importing countries, Great Britain, France, Germany, Belgium, Italy, etc., have enjoyed a large yield per acre than ever has been recorded in their wheat crop history. This extra yield per acre has amounted to the enormous quantity of 165,000,000 bushels more than they would have produced, had they had only an average crop. This means that they will require to buy considerably less wheat from the exporting countries."

"Last importing year, these and other importing countries purchased 770,000,000 bushels of wheat. The extra large crop they have produced this year means they will purchase probably less than 700,000,000 bushels. The balance between the 70,000,000 and the 165,000,000 extra bushels they have produced, will either be fed to stock, used for extra consumption of bread per capita, in the displacement of rye and barley, or put into stores, as larger reserves for the future. This is the simple and outstanding reason for the decline of prices this last year. Unsettling of war debt payments unquestionably have been a reason, too, but probably only in a minor degree, compared to the large European wheat crop."

"The bright ray for the export wheat grower in the situation is, that this particular surplus this year is not the result of increased acreage, but only because of fortunate climatic conditions. It would be an extraordinary coincidence and quite unprecedented if anything like the same high yield per acre should occur again next year."

"Canada," continued Major Strange, "is making enormous gains of wheat this year. Last crop exporting year between August 1 and December 3, 1931, Canada sold wheat to the extent of 10 per cent, of the world export wheat sales during that time. This year, during the same period Canada has sold approximately 60 per cent, of the world's export wheat sales, or more wheat than all the rest of the exporting countries put together. The same amount of wheat that is being sold more than twice as much as Canada sold last year during the same period. It would not appear from this as though the state of inflation or otherwise of any country's currency has anything to do with at least the amount of wheat that is being sold."

"There does not seem to be any reason to suppose that the low purchasing power of European importing countries has lessened to any appreciable degree the amount of wheat they have purchased. The reason probably is that wheat and bread is the cheapest food, and that low purchasing power has curtailed their consumption of more expensive foods, butter, eggs, bacon, meat, etc."

"Indeed, figures recently compiled and published by our research department," said Major Strange, "indicate that during this time of depression the world is certainly not consuming any less cereal food per capita than it did during the boom times of prosperity. China, for instance, as an illustration, is consuming more wheat and rice per capita, for its 430,000,000 people than Canada is consuming wheat per capita for its 10,000,000."

"There is much talk of reduction of acreage, so as to step up the 300,000,000 bushels of wheat surplus in the world that is depressing the wheat market. From my own study, I am of the opinion, for what it may be worth, that the farmers in Australia, Argentina and the United States can much easier, and with less loss to themselves, change from wheat production to the production of animals and animal products, than can the Canadian wheat grower, for the simple reason that in the United States they have an enormous home market for these home products, and when European purchasing power slightly increases, there will be a substantially increased demand for Argentine beef, Australian mutton and lamb and Australian wool, products with which the Canadian farmer, particularly our wheat growers, will find it almost impossible to compete. Our real business seems to be the producing of wheat, which we can do better and of higher quality than any other country in the world."

"Therefore I see no reason why we should reduce our wheat acreage in Canada, and time will certainly bring back a price for wheat that will be better than the cost of production."

Luminous hair dyes, which glow softly in the dark, are the invention of a London hairdresser.

In four months William Coney, working alone, has dug a coal mine in Hereford, England.

Municipal Elections

In a short time the ratepayers of Lacombe will be asked to name their Mayor and council for 1933.

The council, whose time expires, has been a very able one, and has done a lot of good work for the Town. Taxes have been reduced appreciably, which fact was greatly welcomed by everyone, and it is the intention of the council to keep pruning expenses until a still further tax cut can be made. The business of the Town has been efficiently done, and nothing has been neglected on account of the cut in revenue. Financially, the beginning of a new year sees Lacombe in a most enviable position.

The annual meeting will be held Friday evening, January 27th, when the various chairmen will give an account of their stewardship.

In the opinion of The Western Globe, the ratepayers can do no better than to prevail upon the Mayor and Councillors to remain on the board. A plan of retrenchment has been laid out by them, now only partially completed, and it is almost a necessity that they be allowed to carry out their present policy.

To Mayor Jones the thanks of the ratepayers is due. Taking a most active part in every good move, and with the advancement of the Town at heart, his knowledge of general conditions, and his wise counsel have tended to keep the business of the municipality running smoothly, to the benefit of everyone. Mayor Jones, whose term expires, has been approached by many of our citizens, asking that he stand for another term, and while he has not given a definite promise, we are sure he will be willing to keep on the good work, and we do not think that our ratepayers will be making any mistake by returning him to the Mayoralty chair by acclamation.

The retiring councilors are P. C. Owen, W. Avery and Thos. Wilkes, and the conscientious manner in which these gentlemen have attended to their arduous duties also warrants their return, if they will consent to remain on the council.

CARNIVAL AT CLIVE

There will be a grand carnival on the Clive Skating Rink on Friday, January 27th. Valuable prizes will be given for the best costumes. There will be prizes for Men, Women, Boys and Girls. A real good program has been arranged, including skating races and novelty events of different kinds. Attend the carnival and have a good time. General admission 25c.

W.I. SOCIAL AFTERNOON

Twenty six members of the Women's Institute attended the social afternoon held at the home of Mrs. Vaughan on Saturday last. Several items of business were dealt with before the social, among which was the appointment of Mrs. H. French as Convenor of Legislation; reading of a letter from the Provincial President, Mrs. H. Montgomery; and arranging for the February meeting, which is to be held at the home of Mrs. Norris, the first Saturday of the month, at 2:30 p.m. It is expected a review of Technocracy will be given at this meeting. The President drew attention to the fact that Convenor's Reports for the Provincial Convention are being asked for as promptly as possible; also that any members planning on exhibiting work ought now to be making the necessary arrangements, and further was instructed to write for further details regarding exhibition. Mrs. A. Jenkins, Social Convenor had arranged a delightful program, which consisted of contests, a recitation by

small Vera Vaughan, a piano duet by Vena and Kathleen Craigen, and a song by Bert Craigen, all of which were heartily enjoyed. Bert proving himself quite a yodler. A pleasant feature of the afternoon was the presentation to Mrs. W. Newton of a piece of China, as a mark of appreciation of her many years of faithful service as Secretary of the Institute.

WEDDINGS

Married at the Manor, Lacombe, by the Rev. R. B. Layton, on Dec. 28th, Fred Schameborn of Tees to Vergie Myrtle Morrow, Ponoka. On Dec. 28th, John C. Mackie, Stettler, to Virginia Ethel Cundie, Big Valley. On Dec. 31st, George Leicester Bailey, Mirror, to Mary Marjorie Hilda, Mirror.
